Assembly,1969 **Clark Kerr's World of Higher Education Reaches the 21st Century** Sheldon Rothblatt,2012-06-23

This volume consists of original essays by academic leaders and scholars connected to Clark Kerr s life and work He was arguably America s most significant higher education thinker and public policy analyst in the last 50 years of the 20th century and renowned globally However little thoughtful attention has been devoted to assessing the whole of his work Some commentators misunderstand the man as well as his ideas The California Master Plan for Higher Education of 1960 was one of his famous undertakings as was his part in shaping the multi campus University of California towards global eminence He coined the word multiversity to describe what he called the uses of the university but began to think it had become much too multi Some of his most important work was as director of the Carnegie Commission on Higher Education and the Carnegie Council on Policy Studies in Higher Education which laid the foundation for sophisticated policy making The contributors honor the achievements of a remarkable man and provide portraits of him but of equal importance are their critical discussions of the sources of his thinking his attempts to balance access and merit in mass higher education circumstances the policy issues that he confronted and the success of their resolution For many of the contributors Kerr s work is the starting point for understanding policy issues in varying regional and national contexts Often thought to be a social scientist eager to keep abreast of trends Kerr was actually au fond a moralist and surprisingly old fashioned in his personal values

Reporter United States. Office of Education. Division of Higher Education,1963 *The Master's Plan for the Church* John MacArthur,2008-03-01 It is absolutely essential that a church perceive itself as an institution for the glory of God and to do that claims John MacArthur the local church must adhere unfalteringly to biblical leadership principles Christ never intended church leadership to be earned by seniority purchased with money or inherited through family ties He never compared church leaders to governing monarchs but rather to humble shepherds not to slick celebrities but to laboring servants Drawing from some of the best received material on church leadership this updated edition guides the church with crucial effective lessons in leadership This book is valuable not only for pastors and elders but for anyone else who wants the church to be what God intended it to be Reporter United States. Office of Education,1961 Access and Expansion Post-Massification Ben Jongbloed,Hans Vossensteyn,2015-12-14 The twenty first century has the potential to be the era of universal higher education access the post massification century The growth of knowledge based service industries and an increased need for technological and social innovations require more education training and re training at the post secondary level This edited collection addresses the crucial issues emerging from this ongoing expansion of higher education focusing

on how national systems of higher education can respond to demands for further expansion when traditional routes to higher education have been largely exhausted Does it make a difference how secondary education systems are organised Can we encourage under represented groups to participate in higher education offering them new ways of experiencing higher education without sacrificing quality What role will new suppliers of higher education such as private providers and modes of delivery such as MOOCs play Are there innovative ways to manage the finances of universal access including tuition fees and student loans Will all social groups benefit equally from expansion and find the institution and programme that fits their needs Expansion will require different modes of delivery new system models revised qualification structures changes to the role played by government and a revision of the public private finance mix While this may lead to tensions in terms of the quality efficiency or equality of opportunity in the higher education system there are also new opportunities for students and higher education institutions With experienced researchers offering insights national strategies and policy examples from around the world Access and Expansion Post Massification will give researchers and policymakers the tools they need to expand higher education into the era of the knowledge society
