The Maxims (Bilingual Edition: French Text, with a Revised English Translation) François de La Rochefoucauld, 2022-02-14 Of all the French epigrammatic writers La Rochefoucauld 1613-1680 is at once the most widely known and the most distinguished Voltaire said One of the works that most largely contributed to form the taste of the French nation and to diffuse a spirit of justice and precision is the collection of maxims by François duc de La Rochefoucauld though there is scarcely more than one truth running through the book that self love is the motive of everything yet this thought is presented under so many varied aspects that it is nearly always striking And Lord Chesterfield in his letters to his son Till you come to know mankind by your own experience I know no thing nor no man that can in the meantime bring you so well acquainted with them as La Rochefoucauld his little book of Maxims which I would advise you to look into for some moments at least every day of your life is I fear too like and too exact a picture of human nature I own it seems to degrade it but yet my experience does not convince me that it degrades it unjustly The Maxims were first published in 1665 under the title *Reflections or sentences and moral maxims* and the edition of 1678 the fifth from which the text has been used for the present translation was the last revised by the author and published in his lifetime with maxims numbered 1 to 504 Maxims which appeared in previous editions and were suppressed by La Rochefoucauld can be found in the second part entitled *Maxims withdrawn by the author* here numbered 505 to 583 The French original of this bilingual edition was reviewed by Philippe Renaud The English translation originally by John William Willis Bund and James Hain Friswell has been thoroughly revised by Rebecca Hazell and Philippe Renaud Reflections; Or Sentences and Moral

François VI Duc De La Rochefoucauld le Prince de Marcillac 1613 1680 was a noted French author of maxims and memoirs as well as an example of the accomplished 17th century nobleman He was born in Paris in the Rue des Petits Champs at a time when the royal court oscillated between aiding the nobility and threatening it Until 1650 he bore the title of Prince de Marcillac His importance as a social and historical figure is however far inferior to his importance in literature His work in this respect consists of three parts letters Memoirs and the Maxims With a few exceptions La Rochefoucauld's maxims represent the matured result of the reflection of a man deeply versed in the business and pleasures of the world and possessed of an extraordinarily fine and acute intellect on the conduct and motives which have guided himself and his fellows La Rochefoucauld's theories about human nature are based on such topics as self interest and self-love passions and emotions vanity relationships love conversation insincerity and trickery His writings are very concise straightforward and candid
