The concept of the dangerous classes was born in a rapidly urbanizing and industrializing nineteenth century Europe It described all those who had fallen out of the working classes into the lower depths of the new societies surviving by their wits or various amoral disreputable or criminal strategies This included beggars and vagrants swindlers pickpockets and burglars prostitutes and pimps ex soldiers ex prisoners tricksters drug dealers the unemployed or unemployable indeed every type of the criminal and marginal This book examines the dangerous classes in the Middle East and North Africa their lives and the strategies they used to avoid evade cheat placate or occasionally resist the authorities Chapters cover the narratives of their lives their relationship with respectable society their political inclinations and their role in shaping systems and institutions of discipline and control and their representation in literature and in popular culture The book demonstrates the liminality of the dangerous classes and their capacity for re invention It also indicates the sharpening relevance of the concept to a Middle East and North Africa now in the grip of an almost permanent sense of crisis its younger generations crippled by a pervasive sense of hopelessness prone to petty crime and vulnerable to induction as foot soldiers into drug and people smuggling petty gangsterism and jihadism

Managing Egypt's Poor and the Politics of Benevolence, 1800-1952 Mine Ener,2003-09-22 This richly textured social history recovers the voices and experiences of poor Egyptians beggars foundlings the sick and maimed giving them a history for the first time As Mine Ener tells their fascinating stories alongside those of reformers tourists politicians and philanthropists she explores the economic political and colonial context that shaped poverty policy for a century and a half While poverty and poverty relief have been extensively studied in the North American and European contexts there has been little research done on the issue for the Middle East and scant comprehensive presentation of the Islamic ethos that has guided charitable action in the region Drawing on British and Egyptian archival sources Ener documents transformations in poor relief changing attitudes toward the public poor the entrance of new state and private actors in the field of charity the motivations behind their efforts and the poor s use of programs created to help them She also fosters a dialogue between Middle Eastern studies and those who study poverty relief elsewhere by explicitly comparing Egypt s poor relief to policies in Istanbul and also Western Europe Russia and North America Heralding a new kind of research into how societies care for the destitute and into the religious prerogatives that guide them this book is one of the first in depth studies of charity and

philanthropy in a region whose social problems have never been of greater interest to the West
