Beating Time & Measuring Music in the Early Modern Era Roger Mathew Grant, 2014 Beating Time Measuring Music in the Early Modern Era chronicles the shifting relationships between ideas about time in music and science from the sixteenth through the early nineteenth centuries Centered on theories of musical meter the book investigates the interdependence between theories of meter and conceptualizations of time from the age of Zarlino to the invention of the metronome These formulations have evolved throughout the history of Western music reflecting fundamental reevaluations not only of music but also of time itself Drawing on paradigms from the history of science and technology and the history of philosophy author Roger Mathew Grant illustrates ways in which theories of meter and time informed by one another have manifested themselves in the field of music During the long eighteenth century treatises on subjects such as aesthetics music theory mathematics and natural philosophy began to reflect an understanding of time as an absolute quantity independent of events This gradual but

conclusive change had a profound impact on the network of ideas connecting time meter character and tempo Investigating the impacts of this change Grant explores the timekeeping techniques musical and otherwise that implemented this conceptual shift both technologically and materially Bringing together diverse strands of thought in a broader intellectual history of temporality Grant s study fills an unexpected yet conspicuous gap in the history of music theory and is essential reading for music theorists and composers as well as historical musicologists and practitioners of historically informed performance

Maelzel's Chess Player Robert Wilcocks,1994 This is the first study of Freud s texts to incorporate the intellectual findings of Adolf Gr nbaum the archival material published by Jeffrey Masson the recently published correspondence between Freud and Wilhelm Fliess and Lewin s profile of long term cocaine users Wilcocks challenges literary critics who have granted Freud s writings scientific status and claims that the works are no more than the rhetorical deceptions of a talented writer Through a careful examination of the Freud Fliess correspondence and of Freud s case histories and through a novel comparison of Freud s rhetorical devices with Poe s rhetoric of deception in the essay Maelzel s Chess Player Wilcocks reveals that Freud was a talented but disturbed master of deception including self deception

A Musical Life Max Rudolf,2001 This volume offers a collection of articles written by the renowned conductor and scholar Max Rudolf together with a selection of his correspondence relating to material in the articles Max Rudolf s conducting career spanned seventy years from his first performances in 1920 21 to his last in 1990 His life was devoted to performing scholarship and teaching He conducted at the Metropolitan Opera from 1943 to 1937 and was Musical Director of the Cincinnati Symphony from 1938 to 1970 after which he combined guest conducting with teaching opera and conducting at the Curtis Institute in Philadelphia The articles reflect a lifetime of thought on the art of conducting musical style and performance practice Rudolf known as an

interpreter of the classical repertoire freely shared his vast knowledge of Mozart's and Beethoven's scores with colleagues and students. His conducting book *The Grammar of Conducting* has been the leading college text in the field for many years. As such it has extended his influence on many generations of conductors. Throughout his life Rudolf corresponded voluminously with other musicians. The letters included in this volume were selected because they shed a warm personal light on the formal published articles thus providing an opportunity to share the mind and thoughts of an outstanding human being.

Performance Practice Roland Jackson, 2013-10-23 Performance practice is the study of how music was performed over the centuries both by its originators the composers and performers who introduced the works and later by revivalists. This first of its kind Dictionary offers entries on composers musicians performers technical terms performance centers musical instruments and genres all aimed at elucidating issues in performance practice. This A-Z guide will help students scholars and listeners understand how musical works were originally performed and subsequently changed over the centuries. Compiled by a leading scholar in the field this work will serve as both a point of entry for beginners as well as a roadmap for advanced scholarship in the field.

The Sciences in Enlightened Europe William Clark, Jan Golinski, Simon Schaffer, 1999-07 Radically reorienting our understanding of the Enlightenment this book explores the complex relations between enlightened values and the making of scientific knowledge. Here monsters and automata barometers and botanical gardens polite academics and boisterous clubs plans for violent wars and for universal peace are all relocated in the landscape of enlightened Europe. The contributors show how changing forms of discipline machinery and instrumentation affected the emergence of new kinds of knowledge consider how institutions of public taste and conversation helped provide a common frame for the study of human and nonhuman natures and explore the regional operations of scientific culture at the geographical fringes of Europe. Covering a wide range of scientific disciplines both in the principal European countries and in areas peripheral to Europe the book also includes ample illustrations and an extensive bibliography. Implicated in the rise of both fascism and liberal secularism the moral and political values that shaped the Enlightenment remain controversial today. Through careful scrutiny of how these values influenced and were influenced by the concrete practices of its sciences this book gives us an entirely new sense of the Enlightenment from back cover.
