Haszel, 1971 *Null Subjects in Slavic and Finno-Ugric* Gréte Dalmi, Egor Tsedryk, Piotr Ceglowski, 2022-01-19 Even though null subjects have been extensively studied in the past four decades there is a growing interest in partial null subject languages e g Finnish and a subtler classification of null subject phenomena overall This volume aims at contributing to this trend focusing on Slavic and Finno Ugric groups with some extension to Baltic and Samoyedic languages Interestingly these groups offer an impressive array of macro and microvariation Moreover given an increasing interest towards the internal structure of the pronominal elements and the role of various types of topics in the left periphery of the sentence structure the enterprise taken up in this book is to investigate lexical and null referential

and generic subjects in order to understand and compare their feature composition licensing conditions and structural properties Rather than trying to squeeze the studied languages into a predefined set of parameters this volume highlights some properties that may lead to a refinement of the existing generalizations It brings together contributors from both generative and typological traditions and will be of interest to any researcher willing to investigate argument drop in a wider crosslinguistic perspective *Indo-European and the Indo-Europeans* Thomas V. Gamkrelidze,Vjaceslav V.

Ivanov,2010-12-15 Gamkrelidze and Ivanov s wide ranging and interdisciplinary work superbly translated from Russian is a must for every student of Indo European prehistory Its erudition is unsurpassed and its unorthodox conclusions are a continuing challenge Prof Dr Martin Haspelmath Max Planck Institut f r Evolution re Anthropologie The authors propose a revision of views on a number of central issues of Indo European studies Based on findings of typology they suggest a new analysis of the phonological system of Proto Indo European the Glottalic Theory they offer novel assumptions about the relative chronology of changes in PIE vowels and laryngeals Their conclusions are compared with data from Proto Kartvelian In the second part of the book semantically organized presentation of material from the lexicon is combined with analyses of the use of forms and formulae in a broadly defined cultural context Again similarities with properties of primarily Kartvelian and Semitic are described and extended close contacts with these language families are postulated This necessarily leads to a proposal to place the hypothetical Urheimat of the Indo Europeans in the region south of the Caucasus Volume I and II of the original Russian edition have been combined in the English version as Part I the Bibliography and Indexes are published as Part II **The Ohio Educational Monthly ,1901 The British Critic, and Quarterly Theological Review ,1794**

Army,1932 Natural Disasters David Alexander,2018-10-24 As a well balanced and fully illustrated introductory text this book provides a comprehensive overview of the physical technological and social components of natural disaster The main disaster producing agents are reviewed systematically in terms of geophysical processes and effects monitoring mitigation and warning The relationship between disasters and society is examined with respect to a wide variety of themes including damage assessment and prevention hazard mapping emergency preparedness the provision of shelter and the nature of reconstruction Medical emergencies and the epidemiology of disasters are described and refugee management and aid to the Third World are discussed A chapter is devoted to the sociology

psychology economics and history of disasters In many parts of the world the toll of death injury damage and deprivation caused by natural disasters is becoming increasingly serious Major earthquakes volcanic eruptions droughts floods and other similar catastrophes are often followed by large relief operations characterized by substantial involvement of the international community The years 1990 2000 have therefore been designated by the United Nations as the International Decade for Natural Disaster Reduction The book goes beyond mere description and elevates the field of natural catastrophes to a serious academic level The author's insights and perspectives are also informed by his practical experience of being a disaster victim and survivor and hence the unique perspective of a participant observer Only by surmounting the boundaries between disciplines can natural catastrophe be understood and mitigation efforts made effective Thus this book is perhaps the first completely interdisciplinary fully comprehensive survey of natural hazards and disasters It has a clear theoretical basis and it recognizes the importance of six fundamental approaches to the field which it blends carefully in the text in order to avoid the partiality of previous works It covers the earth and social sciences as well as engineering architecture and development studies This breadth is made possible by virtue of a strong emphasis on simple principles of the interaction of geophysical agents with human vulnerability and response All students of environmental sciences studies and geography should find this book useful It is an introductory text which treats this dramatic subject area as something demanding serious academic treatment and not just as an assemblage of horror stories This book is intended for undergraduate students in geography and environmental studies sciences The book should also appeal to any professional or researcher concerned with man environment relations whether in social science or natural science or engineering
