A post-separation Social Accounting Matrix for the Sudan Siddig, Khalid,Elagra, Samir,Grethe, Harald,Mubarak, Amel,2018-02-24 The 2012 Social Accounting Matrix SAM for the Sudan with a special focus on agriculture water and energy is built using data from domestic sources in the Sudan including the Central Bureau of Statistics the Ministry of Agriculture the Ministry of Finance and Economic Planning and the Central Bank of Sudan besides other external sources Major data sets used include the 2012 National Accounts and Trade Statistics of the CBS the 53rd Annual Report of the Central Bank of the Sudan the 2011 Labor Force Survey the 2009 Household Income and Expenditure Survey the 2009 2012 Agricultural Production Cost Survey and the 2005 Industrial Survey Data from external sources are used to complement national sources

Carnegie,Christopher J. Napier,2023-10-12 This Handbook explores how accounting accountability and governance are interconnected and demonstrates that they must operate effectively together in establishing good personal and organizational behaviour in entities of all types around the globe It will be crucial for academic researchers working within the fields of accounting economics corporate governance accountability management and business and be beneficial for accounting economics and management professionals seeking to clarify and expand upon their knowledge for effective application Corporate Social Responsibility, Accountability and Governance Istemi Demirag,2018-10-08 The business case for corporate social responsibility which suggests that socially and environmentally aware companies can expect to reap financial rewards is seemingly gaining widespread acceptance within the business community This is particularly apparent in the ever increasing number of prominent companies parading their social ethical and environmental credentials by producing paper or web based social and environmental or sustainability reports In so doing reporting companies claim they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups However in the prevailing voluntaristic business case centred climate within which such initiatives are taking place little thought appears to

have gone into the question of how stakeholders other than the capital provider group can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence Corporate Social Responsibility Accountability and Governance seeks to explore this missing link between CSR and associated reporting initiatives and governance mechanisms that are capable of embracing true stakeholder accountability A wide range of case studies drawing on experiences of both public and private sector initiatives in Europe the United States Canada South America and Asia offer insightful analysis of the complex relationships between the state the market and civil society in the development of CSR accountability and sustainable development The book employs a multidisciplinary perspective in order to analyse the political social economic technological legal and organisational shaping of CSR The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy driven business case literature painfully exposed Above all the book offers a sound practically and theoretically informed contribution to public policy debate and reflects and builds on urgent calls from public and private sector policy makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility sustainable development and ethics This book is divided into five parts In Part 1 the complex concepts of responsibility accountability and governance are discussed and in particular the presumed relationships between the state the market and civil society in improving accountability and governance are explored and critiqued Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory Part 3 is concerned with empirical studies covering governance structures networking and corporate social responsibility Part 4 deals with corporate governance and its implications for regulators and civil society Part 5 discusses multinational companies and how they impact on national governance regimes Finally a summary is provided with emerging international patterns of accountability and governance structures Corporate Social Responsibility Accountability and Governance will be essential reading for public and private policy makers and practitioners and academics interested in how CSR can become more than a soundbite and rather a substantial force for better global corporate governance and accountability
