began the process of integrating these several modeling systems into a coherent package Thereafter a number of regional scientists have exploited the ideas and insights proposed by Miyazawa especially the notion of the interrelational income multiplier and the ideas of internal and external multipliers *Social Indicators*, 1980 Introductory material and statistical tables on 11 topics e g public safety social participation and use of leisure time Appendixes include sources used and glossary Index

Proceedings , *Population Dynamics and Projection Methods*

John Stillwell, Martin Clarke, 2011-02-15

Although the human population growth rate of the world has been declining since peaking in the early 1960s, the populations of individual countries are changing at different rates. Population dynamics at national level are partly determined by levels of fertility and mortality, but the impact of international migration is playing an increasingly important role. Moreover, internal migration plays a major part in population change at the sub-national level. This fourth volume in the series *Understanding Population Trends and Processes* is a celebration of the work of Professor Philip Rees. It contains chapters by contributors who have collaborated with Phil Rees on research or consultancy projects or as postgraduate students. Several chapters demonstrate the technical nature of population projection modelling and simulation methods, while others illustrate issues relating to data availability and estimation. This book demonstrates the application of theoretical and modelling methods and addresses key issues relating to contemporary demographic patterns and trends.
