Multitasking: Executive Functioning in Dual-Task and Task Switching Situations Tilo Strobach, Mike Wendt, Markus Janczyk, 2018-03-27 Multitasking refers to performance of multiple tasks The most prominent types of multitasking are situations including either temporal overlap of the execution of multiple tasks i e dual tasking or executing multiple tasks in varying sequences i e task switching In the literature numerous attempts have aimed at theorizing about the specific characteristics of executive functions that control interference between simultaneously and or sequentially active component of task sets in these situations However these approaches have been rather vague regarding explanatory concepts e g task set inhibition preparation shielding capacity limitation widely lacking theories on detailed mechanisms and or empirical evidence for specific subcomponents The present research topic aims at providing a selection of contributions on the details of executive functioning in dual task and task switching situations The contributions specify these executive functions by focusing on 1 fractionating assumed mechanisms into constituent subcomponents 2 their variations by age or in clinical subpopulations and or 3 their plasticity as a response to practice and training Mystery

Cognitive Perspectives on Bilingualism Monika Reif,Justyna A. Robinson,2016-04-25 Only 15 years ago bilingualism was
somewhat outside the main debates in cognitive linguistics Cognitive linguistics had to a large extent taken for granted the
fact that language is embodied in our experience However not much attention was given to questions of whether any changes
to our language repertoire alter the way we perceive the world around us A growing body of recent research suggests that
one cannot understand the cognitive foundations of language without looking at bi and multilingual speakers In this vein the
present book aims to contribute to the existing debate of the relationship between language culture and cognition by
assessing differences and similarities between monolingual and bilingual language acquisition and use In particular it
investigates the effect of conceptual semantic and pragmatic properties of constructions on code choice and code switching
as well as the impact of bilingual and bicultural education on speakers cognitive development This collective volume
systematises reviews and promotes a range of theoretical perspectives and research techniques that currently inform work
across the disciplines of bilingualism and code switching **Gas Engine** ,1911
