

A futuristic lunar base, resembling a large, metallic, spherical structure with a grid-like pattern, sits on the moon's surface. Two astronauts in spacesuits stand near the base. The Earth is visible in the background, showing continents and oceans, with a bright blue horizon line. The sky is dark with stars.

The First Men in the Moon Herbert George Wells, 1995 The most dazzling of Wells scientific romances and the last of the series that began with *The Time Machine* this edition offers the only annotated version of *The First Men in the Moon* Wells combines subtle comedy and thrilling adventure in this engaging satire of imperialism and human frailty in which the heroes invade the moon only to be captured by the ant like Selenites Wells established a new level of the science fiction genre with his fantastical but subtle writing The explanatory notes in this edition clarify Wells rich allusions and elucidate the scientific aspects of the moon voyage

The First Men in the Moon H.G. Wells, 2021-08-04 *The First Men in the Moon* H G Wells As I sit down to write here amidst the shadows of vine leaves under the blue sky of southern Italy it comes to me with a certain quality of astonishment that my participation in these amazing adventures of Mr Cavor was after all the outcome of the purest accident It might have been any one I fell into these things at a time when I thought myself removed from the slightest possibility of disturbing experiences I had gone to Lympne because I had imagined it the most uneventful place in the world Here at any rate said I I shall find peace and a chance to work And this book is the sequel So utterly at variance is destiny with all the little plans of men I may perhaps mention here that very recently I had come an ugly cropper in certain business enterprises Sitting now surrounded by all the circumstances of wealth there is a luxury in admitting my extremity

The First Men in the Moon H Wells, 2018-07-20 Of the enormous body of work produced by H G Wells more than a book a year over the course of half a century the early science fiction novels that first made him famous have proved to be the most enduring and have earned him

the sobriquet the father of modern science fiction In the 1901 classic *The First Men in the Moon* Wells reveals not only a fertile imagination at ease with biological and astronomical phenomena but also a passionate concern for man and society His first men in the moon prove to be the eccentric Mr Cavor and his traveling companion Mr Bedford who navigate a gravity defying sphere through space before executing a rough landing on the moon As castaways from earth they practice lunar locomotion get lost in the wilds of a moon jungle and confront intelligent life forms living in lunar caverns Through the adventures of these two earthlings the author is able to look at mankind from a distance and in his words burlesque the effects of specialization The result is a delightful tale filled with adventure romance and fantasy that is still capable of stirring the imagination of readers in the 21st century Wells s science fiction novels achieve a near poetry which makes them part of the popular mythology of their age the best of his work has a vitality a verve an imaginative compulsion unsurpassed by any of his contemporaries N C Nicholson author of *H G Wells* *The First Men in the Moon.* by H. and with sliding windows or blinds made of cavorite by which it can be steered and persuades a reluctant Bedford to undertake a voyage to the moon Cavor is certain there is no life there On the way to the moon they experience weightlessness which Bedford finds exceedingly restful On the surface of the moon the two men discover a desolate landscape but as the sun rises the thin frozen atmosphere vaporizes and strange plants begin to grow with extraordinary rapidity Bedford and Cavor leave the capsule but in romping about get lost in the rapidly growing jungle They hear for the first time a mysterious booming coming from beneath their feet They encounter great beasts monsters of mere fatness that they dub mooncalves and five foot high Selenites tending them At first they hide and crawl about but growing hungry partake of some monstrous coralline growths of fungus that inebriate them They wander drunkenly until they encounter a party of six extraterrestrials who capture them The insectoid lunar natives referred to as Selenites after Selene the moon goddess are part of a complex and technologically sophisticated society that lives underground but this is revealed only in radio communications received from Cavor after Bedford's return to earth Bedford and Cavor break out of captivity beneath the surface of the moon and flee killing several Selenites In their flight they discover that gold is common on the moon In their attempt to find their way back to the surface and to their sphere they come upon some Selenites carving up mooncalves but fight their way past Back on the surface they split up to search for their spaceship Bedford finds it but returns to Earth without Cavor who injured himself in a fall and was recaptured by the Selenites as Bedford learns from a hastily scribbled note he left behind

The First Men in the Moon H. G. Wells,2014-03-13 It is scarcely necessary to go into the details of the speculations that landed me at Lympne in Kent Nowadays even about business transactions there is a strong spice of adventure I took risks In these things there is invariably a certain amount of give and take and it fell to me finally to do the giving reluctantly enough Even when I had got out of everything one cantankerous creditor saw fit to be malignant Perhaps you have met that flaming sense of outraged virtue or perhaps you have only felt it He ran me hard It seemed to me at last that there was nothing for it but to write a play unless I wanted to drudge for my living as a clerk I have a certain imagination and luxurious tastes and I meant to make a vigorous fight for it before that fate overtook me In addition to my belief in my powers as a business man I had always in those days had an idea that I was equal to writing a very good play It is not I believe a very uncommon persuasion I knew there is nothing a man can do outside legitimate business transactions that has such opulent possibilities and very probably that biased my opinion I had indeed got into the habit of regarding this unwritten drama as a convenient little reserve put by for a rainy day That rainy day had come and I set to work
