Medina-Albaladejo,José Miguel Martínez-Carrión,Salvador Calatayud,2023-04-13 Food consumption and nutrition are historically among the most characteristic features of inequality in living standards driven by socioeconomic gender generational and geographical reasons Nutrition directly impacts mortality life expectancy height and illness and thus becomes a good indicator of living standards and their evolution over time However one issue that remains unresolved is how to measure past diet inequalities with the available sources This book evaluates nutritional inequalities in Spain from the nineteenth century to the present day It explores the socioeconomic gender generational and geographical variations in food consumption and nutrition in Spain during this period Deriving historical data on nutrition and diet has always been difficult due to issues with available sources This book adopts a multi dimensional approach and two complementary methodologies capable of presenting a more comprehensive picture the first analyses diets based on primary sources while the second examines the effect of nutritional inequalities on biological living standards with special emphasis on average height This combination allows for greater precision than previous studies on the impacts of food inequality This book will be of significant interest to scholars from different academic branches especially historians economic historians and historians of

science economists and also doctors endocrinologists paediatricians anthropologists nutritionists and expert in cooperation and development

Italian Olive Oil. History and the Role of Italy in the Globalized Olive Oil Market Adrian Burk, 2020-10-05 Seminar paper from the year 2019 in the subject World History Modern History grade 1.0 University of Bologna course Introduction to Italian Culture language English abstract This paper gives an overview of the long history of olive oil production on the actual state territory of Italy from the first evidence in the 18th Century BC until the emphasis of the last 3 decades in the globalized olive oil market. Contemporarily olive oil plays a quite big and still increasing role in the global trend of healthy lifestyle. The historical roots of olive oil production are located in the Mediterranean basin whose bordering states are still the biggest olive oil producers in the world. Due to the growing global consumption for olive oil the production of olive oil augmented in every continent. Non-Mediterranean countries began to compete in the globalized olive oil market. Thus traditional producer countries of the Mediterranean basin like Italy as the third biggest olive oil producing country in 2016/17 are faced with new competitors around the globe.

Bible History and Myth World History, 2024-10-08 Historians have extensively studied the Old and New Testaments and used the scriptures to trace the rise of one of the world's earliest civilisations. Although it's difficult to confirm the stories in the Bible from a historical perspective, it's possible that myths originated from real events. This is why geologists are investigating the truth about the Flood and Noah's Ark. Meteorologists and biologists are trying to understand the ten plagues that affected Egypt, and biblical scholars are searching for evidence of catastrophes that might have destroyed the cities of Sodom and Gomorrah. A book discussing the mysteries of the Bible is speculative but thought-provoking. And it suggests that science and faith may be more closely related than one might think. World History invites you on a fascinating journey to bygone eras, allowing you to explore the greatest events in history. Take a trip back in time to the frontlines of World War 2, to the Viking raids, and to the religious rituals of ancient Egypt. World History is for everyone who would like to know more about the exciting and dramatic events of the past.
