The Middle Woodland Population of the Lower Illinois Valley David L. Asch, 1976 **The Middle Woodland Population of the Lower Illinois Valley** David L. Asch, 1976-01-01 **Late Woodland Societies** Thomas E. Emerson, Dale L. McElrath, Andrew C. Fortier, 2000-01-01

Archaeologists across the Midwest have pooled their data and perspectives to produce this indispensable volume on the Native cultures of the Late Woodland period approximately A D 300 1000 Sandwiched between the well known Hopewellian and Mississippian eras of monumental mound construction the Late Woodland period has received insufficient attention from archaeologists who have frequently characterized it as consisting of relatively drab artifact assemblages The close connections between this period and subsequent Mississippian and Fort Ancient societies however make it especially valuable for cross cultural researchers Understanding the cultural processes at work during the Late Woodland period will yield important clues about the long term forces that stimulate and enhance social inequality Late Woodland Societies is notable for its comprehensive geographic coverage exhaustive presentation and discussion of sites artifacts and prehistoric cultural practices and critical summaries of interpretive perspectives and trends in scholarship The vast amount of information and theory brought together examined and synthesized by the contributors produces a detailed coherent and systematic picture of Late Woodland lifestyles across the Midwest The Late Woodland can now be seen as a dynamic time in its own right and instrumental to the emergence of complex late prehistoric cultures across the Midwest and Southeast *Hopewell in the Lower Illinois Valley* Jane E. Buikstra, 1976 **The Prehistory of Missouri** Michael John O'Brien, W. Raymond Wood, 1998

The Prehistory of Missouri is a fascinating examination of the objects that were made used and discarded or lost by Missouri's prehistoric inhabitants over a period of more than eleven thousand years Missouri's numerous vegetation zones and its diverse topography encompassed extreme variations forcing prehistoric populations to seek a wide range of adaptations to the natural environment As a result Missouri's archaeological record is highly complex and it has not been fully understood despite the vast amount of fieldwork that has been conducted within the state's borders In this groundbreaking account Michael J O'Brien and W Raymond Wood explore the array of artifacts that have been found in Missouri pinpointing minute variations in form They have documented the ranges in age and distribution of the individual forms explaining why certain forms persisted while others quickly disappeared Organized by chronological periods such as Archaic Woodland and Mississippian the book provides a comprehensive survey of what is currently known about Missouri's prehistoric peoples often revealing how they made their living in an ever changing world The authors have applied rigorous standards of archaeological inquiry Their main objective demonstrating that the archaeological record of Missouri can be explained in scientific terms is accomplished With more than 235 line drawings and photographs including 23 color photos The Prehistory of Missouri will appeal to anyone interested in archaeology particularly in the artifacts and the dates of their manufacture as well as those interested in the dichotomy between interpretation and explanation Intended

for the amateur as well as the professional archaeologist this book is sure to be the new standard reference on Missouri's prehistory fulfilling current needs that extend beyond those met by Carl Chapman's earlier classic *The Archaeology of Missouri* **The Cannon Reservoir Human Ecology Project** Michael J. O'Brien, Robert E. Warren, Dennis E.

Lewarch, 2014-05-10 *The Cannon Reservoir Human Ecology Project: An Archaeological Study of Cultural Adaptations in the Southern Prairie Peninsula* provides an overview of the Cannon Reservoir Human Ecology Project formed in May 1977 as an interdisciplinary regional archaeology program to investigate human adaptations on the southern fringes of the midcontinental Prairie Peninsula. The research centered on the area of northeastern Missouri in and around the site of the proposed Clarence Cannon Dam and Reservoir. The book demonstrates how objectives and goals have been integrated with various methods and techniques to generate and analyze a vast amount of data in a regional archaeological project. Comprised of 18 chapters, this book first defines the objectives and goals of the project, describes the project area, and discusses the research design. A brief history of archaeological work in the region is also presented. The next section assesses the environment and implications for human settlement in the area, citing various physical and cultural changes that occurred during the Holocene and presenting developmental models of prehistoric and historical settlement systems. Subsequent chapters explore the chronology of the project area, analysis of lithic artifacts and vertebrate and archaeobotanical remains, prehistoric community patterns, and prehistoric and historic settlement patterns. This monograph will appeal to students, specialists, and researchers in the fields of archaeology and anthropology. **Late Quaternary Environments of the**

United States Herbert Edgar Wright, Stephen C. Porter, 1983 *Archaeology in America* Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet. The American past, the people, battles, industry, and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care. These sites are not in distant lands accessible only by research scientists but nearby; almost every locale possesses a parcel of land worthy of archaeological exploration. *Archaeology in America* is the first resource that provides students, researchers, and anyone interested in their local history with a survey of the most important archaeological discoveries in North America. Leading scholars, most with an intimate knowledge of the area, have written in-depth essays on over 300 of the most important archaeological sites that explain the importance of the site, the history of the people who left the artifacts, and the nature of the ongoing research. *Archaeology in America* divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research. **Archaic Hunters and Gatherers in the American Midwest** James L. Phillips, James A. Brown, 2016-09-16 This volume reports on a series of multidisciplinary projects involving the Archaic period of the American Midwest. A period of innovation and technical achievement, the articles

focus on changes in environmental social and economic factors operating in this period and the adaptation of the hunter gatherer peoples living at this time **The Analysis of Burned Human Remains** Christopher W. Schmidt, Steven A. Symes, 2011-10-10 This unique reference provides a primary source for osteologists and the medical legal community for the understanding of burned bone remains in forensic or archaeological contexts It describes in detail the changes in human bone and soft tissues as a body burns at both the chemical and gross levels and provides an overview of the current procedures in burned bone study Case studies in forensic and archaeological settings aid those interested in the analysis of burned human bodies from death scene investigators to biological anthropologists looking at the recent or ancient dead Includes the diagnostic patterning of color changes that give insight to the severity of burning the positioning of the body and presence or absence of soft tissues during the burning event Chapters on bones and teeth give step by step recommendations for how to study and recognize burned hard tissues
