The Military History Of World War I Vol2 1914 The Battles In The East:

The Cambridge History of the First World War: Volume 2, The State Jay Winter, 2014-01-09 Volume 2 of The Cambridge History of the First World War offers a history of the war from a predominantly political angle and concerns itself with the story of the state. It explores the multifaceted history of state power and highlights the ways in which different political systems responded to and were deformed by the near unbearable pressures of war. Every state involved faced issues of military civilian relations, parliamentary reviews of military policy and the growth of war economies and yet their particular form and significance varied in every national case. Written by a global team of historical experts, this volume sets new standards in the political history of the waging of war in an authoritative new narrative which addresses problems of logistics, morale, innovation in tactics and weapons systems, the use and abuse of science, all of which were ubiquitous during the conflict.

A Military History of the World War Charles Roscoe Howland, 1923 **The Publishers Weekly**, 1917 **The Battle for Palestine 1917** John D. Grainger, 2006 The story of Allied victory in the Holy Land, far from the carnage of the Western Front, but a crucial morale boosting success under the aggressive and forward thinking General Allenby. Three battles for the control of the key fortress city of Gaza took place in 1917 between the British force with units from across the Empire, most notably the ANZACs and the Turks. The Allies were repulsed twice but on their third attempt under the newly appointed General Allenby, a veteran of the Western Front where he was a vocal critic of Haig's command, finally penetrated Turkish lines, captured southern Palestine and as instructed by Lloyd George took Jerusalem in time for Christmas, ending 400 years of Ottoman occupation. This third battle, similar in many ways to the contemporaneous fighting in France, is at the heart of this account, with consideration of intelligence, espionage, air warfare and diplomatic and political elements, not to mention the logistical and medical aspects of the campaign, particularly water. The generally overlooked Turkish defence in the face of vastly superior numbers is also assessed. Far from laying out and executing a pre-ordained plan, Allenby, who is probably still best remembered as T. E. Lawrence's commanding officer in Arabia, was flexible and adaptable, responding to developments as they occurred. JOHN D. GRAINGER is the author of numerous books on military history ranging from the Roman period to the twentieth century.

Combined Arms Warfare in the Twentieth Century Jonathan Mallory House, 2001 For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies. In the process, the art of war has truly become the art of combined arms warfare, in which infantry, artillery, air support, intelligence and other key elements are all coordinated for maximum effect. Nowhere has this trend been more visible than in the history of twentieth century warfare. Originally published as an essential in-house study for U.S. Army officers during the 1980s, this much revised and expanded edition remains the most complete study available on the subject. Rewritten with a much wider readership in mind, it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers. Jonathan House, author of the original work, brings the story of

combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come

Military Review ,1927 *Naval and Overseas War, 1916-1918* Trevor Nevitt Dupuy, Grace Person Hayes ,1967

Quarterly Review of Military Literature ,1940 Innovating Victory Vincent OHara,Leonard R Heinz,2022-04-15

Innovating Victory Naval Technology in Three Wars studies how the world s navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology s best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed *Innovating Victory* shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today s navies which face challenges and questions even greater than those of 1904 1914 and 1939 **Journal of the United States Artillery** ,1947
