The Mind Doesn't Work That Way The Scope And Limits Of Computational Psychology:

The Mind Doesn't Work that Way Jerry A. Fodor, 2000 Jerry Fodor argues against the widely held view that mental processes are largely computations that the architecture of cognition is massively modular and that the explanation of our innate mental structure is basically Darwinian

The Mind Doesn't Work That Way Jerry A. Fodor, 2001-07-27 In this engaging book Jerry Fodor argues against the widely held view that mental processes are largely computations that the architecture of cognition is massively modular and that the explanation of our innate mental structure is basically Darwinian Although Fodor has praised the computational theory of mind as the best theory of cognition that we have got he considers it to be only a fragment of the truth In fact he claims cognitive scientists do not really know much yet about how the mind works the book's title refers to Steve Pinker's *How the Mind Works* Fodor's primary aim is to explore the relationship among computational and modular theories of mind nativism and evolutionary psychology Along the way he explains how Chomsky's version of nativism differs from that of the widely received New Synthesis approach He concludes that although we have no grounds to suppose that most of the mind is modular we have no idea how nonmodular cognition could work Thus according to Fodor cognitive science has hardly gotten started
