Why on Earth? Signe Ecklund Schaefer, 2013-12-01 Life today poses many questions both in our personal lives and in our participation in nature and the broader culture We often focus on the outer needs for social political technological or environmental change However can we really meet the challenges around us without also attending to our inner life and to our own evolving biography as it reflects and informs the outer world This book starts from the premise that each of our lives expresses uniqueness of spiritual intention within the unfolding of universal rhythms and possibilities Can we wake up to the developmental opportunities offered to us through different life phases Are we able to step out of the narrowness of the dualistic nature nurture argument and experience that we are both more than our genetic composition and more than a product of the social and educational influences that have shaped us Can we come to appreciate the learning that our I has received through heredity ethnicity schooling and gender without losing a sense of our true individuality Waking up to our unique self as it grows through interaction with the world and other human beings helps us recognize the significance we all play in one another's biographies and in the unfolding of our larger human story Why on Earth invites us to explore our own meaningful life journey to bring conscious attention to how we go our path so that we may more freely perceive our possibilities and our responsibilities along the way of our personal and shared becoming

Heidegger and the Problem of Phenomena Fredrik Westerlund, 2020-02-20 This book offers a broad critical study of Heidegger's lifelong effort to come to terms with the problem of phenomena and the nature of phenomenology How do we

experience beings as meaningful phenomena What does it mean to phenomenologically describe and explicate our experience of phenomena The book is a chronological investigation of how Heidegger s struggle with the problem of phenomena unfolds during the main stages of his philosophical development from the early Freiburg lecture courses 1919 1923 over the Marburg period and the publication of Being and Time in 1927 up to his later thinking stretching from the 1930s to the early 1970s A central theme of the book is the tension between on the one hand Heidegger s effort to elaborate Husserl s phenomenological approach by applying it to our pre theoretical experience of existentially charged phenomena and on the other hand his drive towards a radically historicist form of thinking Heidegger s main critical engagements with Husserl are examined and assessed along the way Besides offering a new comprehensive interpretation of Heidegger s philosophical development the book critically examines the philosophical power and problems of Heidegger s successive attempts to account for the structure of phenomena and the possibility of phenomenology In particular it develops a critique of Heidegger s radical historicism arguing that it ultimately makes Heidegger unable to account either for the truth of our understanding or for the ethical existential significance of other persons The book also contains a chapter which probes the philosophical commitments that motivate Heidegger s political engagement in National Socialism
