Unemployment Among Older Workers United States. Congress. Senate. Special Committee on Aging. Subcommittee on Employment and Retirement Incomes, 1971 **Hearings, Reports and Prints of the Senate Special Committee on Aging** United States. Congress. Senate. Special Committee on Aging, 1971 Mexican Americans and the Environment Devon G. Peña, 2022-09-13 Mexican Americans have traditionally had a strong land ethic believing that humans must respect la tierra because it is the source of la vida As modern market forces exploit the earth communities struggle to control their own ecological futures and several studies have recorded that Mexican Americans are more impacted by environmental injustices than are other national origin groups In our countryside agricultural workers are poisoned by pesticides while farmers have lost ancestral lands to expropriation And in our polluted inner cities toxic wastes sicken children in their very playgrounds and homes This book addresses the struggle for environmental justice grassroots democracy and a sustainable society from a variety of Mexican American perspectives It draws on the ideas and experiences of people from all walks of life activists farmworkers union organizers land managers educators and many others who provide a clear overview of the most critical ecological issues facing Mexican origin people today The text is organized to first provide a general introduction to ecology from both scientific and political perspectives It then presents an environmental history for Mexican origin people on both sides of the border showing that the ecologically sustainable Norte o land use practices were eroded by the conquest of

El Norte by the United States It finally offers a critique of the principal schools of American environmentalism and introduces the organizations and struggles of Mexican Americans in contemporary ecological politics Devon Pe a contrasts tenets of radical environmentalism with the ecological beliefs and grassroots struggles of Mexican origin people then shows how contemporary environmental justice struggles in Mexican American communities have challenged dominant concepts of environmentalism Mexican Americans and the Environment is a didactically sound text that introduces students to the conceptual vocabularies of ecology culture history and politics as it tells how competing ideas about nature have helped shape land use and environmental policies By demonstrating that any consideration of environmental ethics is incomplete without taking into account the experiences of Mexican Americans it clearly shows students that ecology is more than nature study but embraces social issues of critical importance to their own lives Sociology and Social Research ,1927 Includes the section Book notes *American Baptist Home Missions* ,1895 **Report of the Executive Committee** American Baptist Home Mission Society,1917 Report ... Baptist Home Missionary Society for Scotland,1915
