The Mind And Method Of The Historian:

The Mind and Method of the Historian Emmanuel Le Roy Ladurie, 1984

The Mind and Method of the Historian Emmanuel Le Roy Ladurie, 2017-02-23 There cannot be much serious doubt that in the last twenty years Emmanuel Le Roy Ladurie has been one of the most if not the most original versatile and imaginative historians in the world he has acquired an almost unique capacity to capture the imagination of a mass audience while still retaining the respect and admiration of his professional colleagues LAWRENCE STONE New York Review of Books In addition to being a gifted storyteller Ladurie is a committed student of the 100 odd places historians must go to piece together the stories of the unwashed and unnoticed of the techniques to weave incomplete and various kinds of evidence into the cloth of history The essays share an interest in discovering what life itself and not just the events of life was like in the past how people lived loved took sick or didn't take sick what they ate who they listened to the weather the crops status and the long term trends of such things that give us a picture of aggregate life ROBERT DAWIDOFF Los Angeles Times makes for provocative and interesting reading even for those who might consider themselves devotees of an older style of history Ladurie is one of those unusual scholars who even as he fulfils the typical expectation of his calling is also transforming it with his own vision of what it might be STANLEY J

IDZERDA Review of Politics **The Logic of Historical Explanation** Clayton Roberts, 1995-12-15 Ever since 1942 when Carl Hempel declared that historical events are explained by subsuming them under laws governing the occurrence of similar events philosophers have debated the validity of explanations based on covering laws In The Logic of Historical Explanation Clayton Roberts provides a key to understanding the role of covering laws in historical explanation He does so by distinguishing between their use at the macro and micro levels a distinction that no other scholar has made Roberts contends that the positivists were right to believe that covering laws are indispensable in historical explanations but wrong to think that these laws apply to macro events such as wars and revolutions Similarly the humanists were right to declare that historians do not explain the occurrence of macro events by subsuming them under covering laws but wrong to deny the role of covering laws in tracing the course of events leading to the macro event Roberts resolves this debate by showing that though useless in explaining macro events covering laws are indispensable in connecting the steps in an explanatory narrative He then sets forth the logic of an explanatory narrative explores the nature of rational explanation and distinguishes the logic of historical interpretation from the logic of historical explanation **Landmark Essays on**

American Public Address Martin J. Medhurst, 2020-08-26 This volume traces the historical evolution of American academic thought concerning public address what it is how it ought to be studied and what can be learned by engaging rhetorical texts in an analytical fashion To begin one must distinguish among three separate but interrelated uses of the term public address as practice theory and criticism The essays in this volume represent landmarks in the literal sense of that term they are marks on the intellectual landscape that indicate where scholars and ideas have passed and in that passing left a mark for

future generations It is appropriate to revisit the landmarks that have set public address off as a field of study and it allows readers to remember the struggles that have led to the current situation Most of the authors of the following chapters are deceased but their ideas live on transformed adapted modified rejected and reborn The scholarly dialectic continues What constitutes a study in public address how best to approach rhetorical texts which analytical tools are required for the job how best to balance text with context and what role ought theory to play in the conduct or outcome of critical inquiry these questions live on To answer them at all is to engender debate and that is how it should be if the intellectual vitality of public address is to be maintained The papers are a prolegomenon to such studies for they mark where scholars have been and point the way to where they still must go

The Occult Mind Christopher Lehrich, 2012-08-17 Given the historical orientation of philosophy is it unreasonable to suggest a wider cast of the net into the deep waters of magic By encountering magical thought as theory we come to a new understanding of a thought that looks back at us from a funhouse mirror from The Occult Mind Divination like many critical modes involves reading signs and magic more generally can be seen as a kind of criticism that takes the universe seen and unseen known and unknowable as its text In The Occult Mind Christopher I Lehrich explores the history of magic in Western thought suggesting a bold new understanding of the claims made about the power of various belief systems In closely interlinked essays on such disparate topics as ley lines the Tarot the Corpus Hermeticum writing and ritual in magical practice and early attempts to decipher Egyptian hieroglyphics Lehrich treats magic and its parts as an intellectual object that requires interpretive zeal on the part of readers observers Drawing illuminating parallels between the practice of magic and more recent interpretive systems structuralism deconstruction semiotics Lehrich deftly suggests that the specter of magic haunts all such attempts to grasp the character of knowledge Offering a radical new approach to the nature and value of occult thought Lehrich's brilliantly conceived and executed book posits magic as a mode of theory that is intrinsically subversive of normative conceptions of reason and truth In elucidating the deep parallels between occult thought and academic discourse Lehrich demonstrates that sixteenth century occult philosophy often touched on issues that have become central to philosophical discourse only in the past fifty years

The Expository Times, 1911

The Mind and Method of the Economist Brian J. Loasby, 1989 This major book comprises amongst other essays critical appraisals of major economists including Alfred Marshall Joan Robinson G B Richardson W J Baumol Frank Hahn and Herbert Simon and of Austrian economics and diverse approaches to co ordination failure in macroeconomics

The Mind of Thucydides Jacqueline de Romilly, 2017-12-15 The publication of Jacqueline de Romilly's *Histoire et raison chez Thucydide* in 1956 virtually transformed scholarship on Thucydides Rather than mining The Peloponnesian War to speculate on its layers of composition or second guess its accuracy it treated it as a work of art deserving rhetorical and aesthetic analysis Ahead of its time in its sophisticated focus upon the verbal texture of narrative it proved that a literary approach offered the most productive and nuanced way to study Thucydides Still in print in the original

French the book has influenced numerous Classicists and historians and is now available in English for the first time in a careful translation by Elizabeth Trapnell Rawlings The Cornell edition includes an introduction by Hunter R Rawlings III and Jeffrey Rusten tracing the context of this book s original publication and its continuing influence on the study of Thucydides Romilly shows that Thucydides constructs his account of the Peloponnesian War as a profoundly intellectual experience for readers who want to discern the patterns underlying historical events Employing a commanding logic that exercises total control over the data of history Thucydides uses rigorous principles of selection suggestive juxtapositions and artfully opposed speeches to reveal systematic relationships between plans and outcomes impose meaning on the smallest events and insist on the constant battle between intellect and chance Thucydides mind found in unity and coherence its ideal of historical truth

The Routledge Companion to Historical Studies Alun Munslow, 2002-01-04 With twenty nine new entries and updated existing ones this new edition provides a much needed critical introduction to the key issues historians and philosophers and their ideas and theories which have prompted the rethinking of history

A Study of School Reform from the Perspective of the Annales School of French Historiography Allan John Pitman, 1986
