January 4 1831 The new year was ushered in by the disastrous death of a number of unfortunate pigs which were poisoned by drinking of the water in which cassava root had been washed With their fate before my eyes would you believe that I ate a large plate of cassava pie at dinner Though the root in its raw state is a deadly poison it is quite innocent when cooked for the action of heat deprives it of its noxious qualities which reside in the juice It is first carefully washed and scraped and then grated into a tub after which it is put into a bag and the juice squeezed out The farina is mixed into a thick soft paste and made up into meat pies L3 J which are the standing dish at Christmas Cassava puddings and cakes are delicious but the plant is cultivated here only in small quantities owing to the accidents which have occurred from its being eaten in its unprepared state The cassava or mandioca *jatropha manihot* is a pretty and very knotty shrub growing about four or five feet high The terminations of the branches are covered with leaves and the flowers are placed in an umbel round the extremities These are succeeded by nuts which possess powerful medicinal qualities The root is about the size of an ordinary carrot but I never heard of any tapioca being prepared from it in Bermuda There are two sorts of cassava the sweet and the bitter it is the root of the latter only which is poisonous Another plant having noxious qualities grows wild chiefly in low sheltered vallies and about the entrance of caves and generally climbs like ivy round some taller tree The poison weed or vine which appears to be a species of rhws perhaps the *R radicans* nearly allied to *Rhus toxicodendron* the **Sketches of Bermud** Richard Cotter, 2009-05 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it
