Turner, 2011-03-10 *Writing the Heavenly Frontier* celebrates the early voices of the air as it examines the sky as a metaphorical and political landscape While flight histories usually focus on the physical dangers of early aviation this book introduces the figurative liabilities of ascension Early pilot writers not only grappled with an unwieldy machine they also grappled with poetics that were extremely selective Tropes that cast Charles Lindbergh as the transcendent hero of the new millennium were the same ones that kept women black Americans and indigenous peoples imaginatively tethered to the ground The most popular flight autobiographies in the United States posited a hero who rose from the mundane to the miraculous and yet the most startling autobiographies point out the social factors that limited or forbade vertical movement both literally and figuratively A survey of pilot writing the book will appeal to flight enthusiasts and people interested in American autobiography and culture But it will also appeal strongly to readers interested in the poetics and politics of place

Antarctica David Day, 2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic

personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it *Northscapes* Dolly Jørgensen, Sverker Sörlin, 2013-11-08 This book argues that the unique environments of the North have been borne of the relationship between humans and nature Approaching the topic through the lens of environmental history the contributors examine a broad range of geographies including those of Iceland and other islands in the Northern Atlantic Sweden Finland Russia the Pacific Northwest and Canada over a time span ranging from CE 800 to 2000 *Northscapes* is bound together by the intellectual project of investigating the North both as an imagined and mythologized space and as an environment shaped by human technology The North offers a valuable analytical framework that surpasses nation states and transgresses political and historical borders This volume develops rich explorations of the entanglements of environmental and technological history in the northern regions of the globe

Skyward Richard Evelyn Byrd, 1928 The story of Richard E Byrd an American naval officer and explorer He was a recipient of the Medal of Honor and was a pioneering American aviator polar explorer and organizer of polar logistics Byrd claimed that his expeditions had been the first to reach both the North Pole and the South Pole by air **Atlantic Fever** Joe Jackson, 2012-05-08 For five weeks from April 14 to May 21 1927 the world held its breath while fourteen aviators took to the air to capture the 25 000 prize that Raymond Orteig offered to the first man to cross the Atlantic Ocean without stopping Joe Jackson's *Atlantic Fever* is about this race a milestone in American history whose story has never been fully told Delving into the lives of the big name competitors the polar explorer Richard Byrd the French war hero Ren Fonck the millionaire Charles Levine and the race's eventual winner the enigmatic Charles Lindbergh as well as those whose names have been forgotten by history such as Bernt Balchen Stanton Wooster and Clarence Chamberlin Jackson brings a completely fresh and original

perspective to the race to conquer the Atlantic Atlantic Fever opens for us one of those magical windows onto a moment when the nexus of technology innovation character and spirit led so many contenders from different parts of the world to be on the cusp of the exact same achievement at the exact same time *Time* Briton Hadden, Henry Robinson Luce, 1929

Anthony Fokker Marc Dierikx, 2018-04-03 Comprehensive biography of Anthony Fokker the famed Dutch pilot and daredevil aviator Anthony Fokker The Flying Dutchman Who Shaped American Aviation tells the larger than life true story of maverick pilot and aircraft manufacturer Anthony Fokker Fokker came from an affluent Dutch family and developed a gift for tinkering with mechanics Despite not receiving a traditional education he stumbled his way into aviation as a young stunt pilot in Germany in 1910 He survived a series of spectacular airplane crashes and rose to fame within a few years A combination of industrial espionage luck and deception then propelled him to become Germany's leading aircraft manufacturer during World War I making him a multimillionaire by his midtwenties When the German Revolution swept the country in 1918 and 1919 Fokker made a spectacular escape to the United States He set up business in New York and New Jersey in 1921 and shortly thereafter became the world's largest aircraft manufacturer The U S Army and Navy acquired his machines and his factories equipped legendary carriers such as Pan American and TWA at the dawn of commercial air transport Yet despite his astounding success his empire collapsed in the late 1920s after a series of ill conceived business decisions and deeply upsetting personal dramas In 1927 aviator Richard Byrd solicited a Fokker three engine plane to be the first to fly non stop across the Atlantic The plane was damaged on a test flight and Charles Lindbergh beat him to it Lindbergh's solo adventure in the Spirit of St Louis earned him and cost Fokker a lasting place in the history books Using previously undiscovered records and primary sources Marc Dierikx traces Fokker's extraordinary life and celebrates his spectacular achievements **The Publishers Weekly**, 1928 *Bulletin of the Maine State Library* Maine State Library, 1926
