Slide Mountain Or The Folly Of Owning Nature:

Slide Mountain Theodore Steinberg, 1996-11-07 The drive to own the natural world in twentieth century America seems virtually limitless Signs of this national penchant for possessing nature are everywhere from suburban picket fences to elaborate schemes to own underground water clouds even the ocean floor Yet as Theodore Steinberg demonstrates in this compelling witty look at Americans attempts to master the environment nature continually turns these efforts into folly In a rich narrative style recalling the work of John McPhee Steinberg tours America to explore some of the more unusual dilemmas that have arisen in our struggle to possess nature Beginning along the Missouri River Steinberg recounts the battle for three thousand acres of land the river carved from a Nebraska Indian reservation and deposited in Iowa Then he travels to Louisiana where an army of lawyers butted heads over whether Six Mile Lake was actually a lake or a stream He continues to Arizona to investigate who owned the underground then to Pennsylvania s Blue Ridge Mountains to see who claimed the clouds He ends in crowded New York City with Donald Trump s struggle for air rights Americans obsession with owning nature was immortalized by Mark Twain in the tale of Slide Mountain where a landslide prone Nevada peak turned the American dream of real estate into dust In relating these modern day Slide Mountain stories Steinberg illuminates what it means to live in a culture of property where everything must have an owner Slide mountain , **Industrial Cowboys** David Igler, 2005-01-28 The process by which two neighborhood butchers turned themselves into landed industrialists depended to an extraordinary degree on the acquisition manipulation and exploitation of natural resources Igler examines the broader impact of western industrialism as exemplified by Miller Lux on landscapes and waterscapes bringing to the forefront the important issues of land reclamation water politics San Francisco s unique business environment and the city s relation to its surrounding hinterlands He provides a rich discussion of the social relations engineered by Miller Lux from the dispossession of Californio rancheros to the ethnic segmentation of the firm s massive labor force Jacket *Research Handbook on Legal Semiotics* Anne Wagner, Sarah Marusek, 2023-11-03 This comprehensive Research Handbook explores the wide variety of work conducted in legal semiotics to provide a broad understanding of how the law works through signs and symbols Demonstrating that law is a strategical system of fluctuating signs contributors critically analyse the ever evolving conceptualisations of law and legal discourse Property Diversity and its Implications John Page, 2016-08-05 Property is more diverse than is usually assumed Developing the concept of property diversity this book explores the varied role of property in placed human landscapes In acknowledging the propertied diversity about us the book highlights the paucity of our settled contemporary assumptions of property as defined by private ownership Challenging this universalizing model the book analyses how this self limiting view produces critical blind spots in modern property discourse In response it offers a re conceptualization of property that matches the grounded reality of our rich and diverse relationships with land Integrating the plurality of real property types private public and common with inclusive understandings of both interest and ownership

it thus identifies and substantiates an overarching theory of property diversity Drawing on studies from numerous jurisdictions including the USA New Zealand Australia and the UK its analysis of property as something more and indeed other than a place less abstraction provides an invaluable contribution to the contemporary law and theory of property

The Place with No Edge Adam Mandelman,2020-04-08 In *The Place with No Edge* Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people s use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana s Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system s failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming s rising seas and strengthening storms *The Place with No Edge* advocates for a deeper understanding of humans relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways
