A. Gasc, 1884 **Chalk Talks in Internal Medicine** Somnath Mookherjee, Lauren A. Beste, Jared W. Klein, Jennifer Wright, 2020-09-30 This book provides teaching scripts for medical educators in internal medicine and coaches them in creating their own teaching scripts Every year thousands of attending internists are asked to train the next generation of physicians to master a growing body of knowledge Formal teaching time has become increasingly limited due

to rising clinical workload medical documentation requirements duty hour restrictions and other time pressures In addition today s physicians in training expect teaching sessions that deliver focused evidence based content that is integrated into clinical workflow In keeping with both time pressures and trainee expectations academic internists must be prepared to effectively and efficiently teach important diagnostic and management concepts A teaching script is a methodical and structured plan that aids in effective teaching The teaching scripts in this book anticipate learners misconceptions highlight a limited number of teaching points provide evidence to support the teaching points use strategies to engage the learners and provide a cognitive scaffold for teaching the topic that the teacher can refine over time All divisions of internal medicine e g cardiology rheumatology and gastroenterology are covered and a section on undifferentiated symptom based presentations e g fatigue fever and unintentional weight loss is included This book provides well constructed teaching scripts for commonly encountered clinical scenarios is authored by experienced academic internists and allows the reader to either implement them directly or modify them for their own use Each teaching script is designed to be taught in 10 15 minutes but can be easily adjusted by the reader for longer or shorter talks Teaching Scripts in Internal Medicine is an ideal tool for internal medicine attending physicians and trainees as well as physician s assistants nurse practitioners and all others who teach and learn internal medicine

From the Minds of Jazz Musicians, Volume II David Schroeder,2023-10-13 From the Minds of Jazz Musicians Volume II Conversations with the Creative and Inspired is a follow up to Volume I s celebration of contemporary jazz artists who have toiled struggled and succeeded in finding their creative space Volume II was developed through transcribing and editing selected interviews with 29 jazz artists conducted by the author since 2011 along with a historical essay on each artist The interviews feature musicians from a broad range of musical styles and experiences with their beginnings ranging from the 50s to the early 80s Topics range from biographical life histories to descriptions of mentor relationships revealing the important life lessons they learned along the way With the goal to discover the person behind the persona the author elicits conversations that speak of the creative process mining the individualistic perspectives of seminal artists who witnessed history in the making By comparing and contrasting each artist s perspective to discover similarities in their career paths these volumes are an important research tool for students and academics offering direct information from leading figures in the jazz world

The Medical Evaluation of Psychiatric Symptoms Eric G. Meyer,Kelly L. Cozza,James A. Bourgeois,2023-08-04 Every DSM 5 diagnosis includes an exclusion criterion that the disorder is not better explained by a medical condition Meeting this criterion can be difficult for a variety of reasons The psychiatric signs and symptoms of medical disorders are not commonly emphasized in medical textbooks Further illness scripts for medical diagnoses do not often overlap with psychiatric disorders making it difficult to know what medical conditions should be ruled out For example irritability is a common symptom in polycystic ovarian disorder but PCOS is rarely on the differential for irritability Similarly while hypothyroidism is commonly linked to the illness script of depression patients with MDD may be just as likely to have

diabetes an infrequently considered diagnosis for depression Buzzword medical conditions that are commonly prioritized in medical student training can negatively influence classic illness scripts While such diagnostic possibilities make for good multiple choice questions they are frequently rare and may inadvertently undermine important common possibilities For example a patient with chest pain in the context of anxiety is more likely to have asthma acute coronary syndrome or even a pulmonary embolism than pheochromocytoma In a recent white paper issued by the American Psychiatric Association it has urged psychiatrists to better advocate for patients with severe mental illness who often lack access to primary care But some psychiatrists may be unfamiliar with physical exam maneuvers and medical review of systems ROS questions Complex medical systems may delegate the physical exam to physicians outside of psychiatry or there may be a temptation to rely on the emergency room s medical clearance as a medical rule out Both can result in decreased familiarity with physical exam techniques previously mastered as part of medical school A cursory review of the physical exam maneuvers and concise symptom based medical ROS lists can alleviate some of these concerns This book is intended to provide psychiatrists and physicians who routinely evaluate psychiatric symptoms with the tools needed to rule out medical conditions that could be causing those symptoms It will start with an introduction that reviews why the text is needed and potential larger gaps in training that might contribute to the necessity for such a text Each chapter thereafter will focus on a specific symptom Each symptom will be defined to ensure accuracy Then a differential of common medical conditions that can cause that psychiatric symptom will be provided For each diagnosis key history physical exam laboratory and radiologic findings will be provided that help rule the condition out Screening tools that can help rule out medical etiologies will also be provided Where available positive predictive values PPVs will be provided to help users understand the likelihood that a negative finding or result indicated that a medical disorder is not present While individual aspects of this text exist in other formats the comprehensive nature of our approach descriptions of psychiatric symptoms to means of ruling out potential medical etiologies is not currently available to providers This text will assist providers in ruling out medical etiologies of common psychiatric symptoms ensuring patients are diagnosed correctly Such an improvement has the potential to dramatically improve patient outcomes
