Sm Oracle9i New And Adv Feature:

Sm Oracle9i New and Adv Feature, 2004-06 This course is designed for database administrators who will be moving to the Oracle9i database platform. This course presents the new and advanced features of the database introduced in its 9i release. Target audience for this course is senior Oracle database administrators who have experience with Oracle8i and wish to exploit the advanced features introduced in Oracle9i.

The SAGE Encyclopedia of Social Science Research Methods

Methods Michael Lewis-Beck, Alan E Bryman, Tim Futing Liao, 2004 This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels. As a teaching resource it will be useful to instructors and students alike and will become a standard reference source. Essential for general and academic collections.

CHOICEAppreciative users of this volume will be students faculty and researchers in academic special and large public libraries for whom it is recommended. LIBRARY JOURNALSAGE Reference is proud to announce The SAGE Encyclopedia of Social Science Research Methods a three volume resource that is a first of its kind developed by the leading publisher of social science research methods books and journals. This unique multi volume reference set offers readers an all encompassing education in the ways of social science researchers. Written to be accessible to general readers entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods. The Encyclopedia features two major types of entries definitions consisting of a paragraph or two provide a quick explanation of a methodological term and topical treatments or essays discussing the nature history application example and implication of using a certain method. Also included are suggested readings and references for future study. To help provide a more complete explanation than is often achieved within the scope of a single article key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere. In addition to epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from philosophical issues such as poststructuralism to advanced statistical techniques. In covering the full range of qualitative and quantitative data analyses this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way stimulating both interest and new perspectives. One example is the entry Econometrics by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process from economic theory to data and models to analysis once in principle and a second time with an example. In using the ordinary process of economic research to achieve an extraordinary impact he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics.

Topics Covered Analysis of Variance Association and Correlation Basic Qualitative Research Basic Statistics Causal Modeling Structural Equations Discourse Conversation Analysis Econometrics Epistemology Ethnography Evaluation Event History

Analysis Experimental Design Factor Analysis Related Techniques Feminist Methodology Generalized Linear Models
Historical Comparative Interviewing in Qualitative Research Latent Variable Model Life History Biography LoglinearModels
