Technology and Competitive Advantage in Small Firms Brian Webb, Frank Schlemmer, 2008-07-24 Does Information Technology matter This book argues that even as Information Technology hardware software data and associated processes are becoming more of a commodity it has never been more important to manage Information Technology as a strategic asset However managing Information Technology as a strategic asset is notoriously difficult a Chinese Entrepreneurship and Asian Business Networks Thomas Menkhoff, Gerke Solvay, 2012-11-12 The degree to which the extensive business networks of ethnic Chinese in Asia succeed because of ethnic characteristics or simply because of the sound application of good business practice is a key question of great current concern to those interested in business management and economic development in Asia This book brings together a range of leading experts who present original new research findings and important new thinking on this vital subject Based on rich empirical research data and a multidisciplinary explanatory framework this book assesses the role characteristics and challenges of Chinese entrepreneurship and business networks in various East and Southeast Asian countries the People s Republic of China Vietnam Malaysia Singapore Indonesia and Australia Chinese Entrepreneurship and Asian Business Networks demonstrates that Chinese network capitalism is contingent upon for example time place institutional frameworks and that explanatory approaches of Chinese economic behaviour which stress culture and ethnicity are too simplistic

Young,Ivan Teodorovi?,Peter Koveos,2002 To date the record of economic transition has decidedly been mixed The worldwide political climate is still in favor of economic reform and the process continues to have considerable momentum On the other hand this process now faces a number of formidable obstacles There appears to be general agreement that in many countries the promise of a better standard of living which economic transition offers to the mass of the citizenry has failed to produce the rapid and dramatic results hoped for There is an increasing conflict of interest between multinational firms and the national business community Moreover many transition economies have experienced a slowing of economic growth in real terms and social services have been severely cut This book deals with the development of those forces that have played a major role in the successes and failures of economic transition Its distinctive feature is that it does this from the perspective of economic political and social analysis taking into account both theoretical constructs and economic realities for those countries which have attempted the grand experiment with economic transition *De Gruyter Handbook of SME Entrepreneurship* Marina Dabić,Sascha Kraus,2023-11-06 A small business is not a little big business Small and medium sized enterprises SMEs are considered the engines of worldwide economies and the main sources of job creation Management in these companies is different from management in larger older enterprises with their already established concepts and instruments In view of the high importance of SMEs in emerging developing and developed economies worldwide the De Gruyter Handbook of SME Entrepreneurship investigates the underlying mechanisms and practices of management within these companies with a focus on entrepreneurship growth and innovation It argues that it is time for a dedicated theory of SME Entrepreneurship to emerge Entrepreneurial thinking and behavior in SMEs must be

The Political Economy of Trust Henry Farrell, 2009-08-24 Trust and cooperation are at the heart of the two most important approaches to comparative politics rational choice and political culture Yet we know little about trust's relationship to political institutions This book sets out a rationalist theory of how institutions and in particular informal institutions can affect trust without reducing it to fully determine expectations It then shows how this theory can be applied to comparative political economy and in particular to explaining inter firm cooperation in industrial districts geographical areas of intense small firm collaboration The book compares trust and cooperation in two prominent districts in the literature one in Emilia Romagna Italy and the other in Baden Württemberg Germany It also sets out and applies a theory of how national informal institutions may change as a

result of changes in global markets and shows how similar mechanisms may explain persistent distrust too among Sicilian Mafiosi

The Business of Networks Robert Huggins, 2020-08-26 This title was first published in 2000 The first book which brings together and interprets both the theoretical concepts associated with the study of networks in the business world and the policy applications being applied to the practical building and development of such networks It maps the changes in the culture of economic development policy that occurred in the UK during the 1990s incorporating a detailed assessment of the contribution that the Training and Enterprise Councils made to business support policies The book is published at a time when network and cluster building has risen to the top of economic development agendas not only in UK but in many countries throughout the world It offers the most detailed insight so far available into the structure motivations and processes involved in developing business networks through institutional intervention The book is relevant to anyone with an interest in business policy and theory
