Principles of Medical Therapy in Pregnancy Norbert Gleicher, 2012-12-06 Prefaces of textbooks are generally meant to give editors an opportunity to express the rationale for the creation of yet another textbook It is rare to find an author or

editor who does not believe that his her book fills a very specific need This editor is no exception With the incredible proliferation of medical textbooks in recent years it has become difficult to find an empty niche for yet another text Nevertheless the editors and authors of Principles of Medical Therapy in Pregnancy have been impressed by one very clearly appreciated void While the association of medical disorders with pregnancy is increasing in frequency as improved medical care allows more patients with medical diseases to conceive an authoritative text covering the issue comparable to an authoritative text in internal medicine has been missing With pregnancy representing a very specific disease situation different from the nonpregnant state in diagnosis management and course of disease a detailed textbook addressing all these issues for both the internist and the obstetrician seemed urgently needed *FDA Consumer* ,1989 *Percutaneous Absorption* Nina Dragičević,Howard Maibach,2021-07-29 Updating and expanding the scope of topics covered in the previous edition *Percutaneous Absorption Drugs Cosmetics Mechanisms Methods Fifth Edition* supplies new chapters on topics currently impacting the field including cutaneous metabolism skin contamination exposure to protein allergens in vitro absorption methodology and the percutaneous absorption of chemical mixtures Complete with studies on the role of the skin as a key portal of entry for chemicals into the body this book serves as a detailed reference source for recent advances in the field as well as an experimental guide for laboratory personnel Key Features Details in vivo and in vitro methods for measuring absorption dermal decontamination mechanisms of transdermal delivery and the relationship of transepidermal water loss to percutaneous absorption Considers a range of mathematical models the safety evaluation of cosmetic ingredients the absorption of hair dyes nanoparticles for drug delivery and other novel methods of drug delivery Discusses topics including skin metabolism the skin reservoir and the effects of desquamation on absorption *Smoking and Reproduction (1984)* Ernest L Abel,2017-11-22 The annotated bibliography that follows summarizes some of the more important studies that have been published concerning smoking and its effects on the fetus along with reports of the various efforts that have been undertaken to reduce the impact of smoking during pregnancy The material has been divided into topics to guide the reader and cross references are included at the end of each section An Author Index is also included to guide the reader to relevant publications when only an author s name is known The following comments constitute an overall summary of the literature *Children Today* ,1981 *Child Development* Neil J. Chasnoff,2012-12-06 With the emergence of the biological sciences in the seventeenth and eighteenth centuries some explanations of congenital malformations with a basis in scientific fact were formulated It was not however until the thalidomide tragedy in 1961 that the necessity for further study of the effects of environmental factors on congenital malformations was recognized By the early 1970s concentrated efforts had begun to be directed toward evaluating the

effects on the unborn child of mood altering drugs taken during pregnancy Over the past decade research and treatment programs have led to the recognition of a full range of psychoactive drugs that affect the developing fetus either somatically or behaviorally Programs for the treatment of the pregnant drug addict have been developed which concentrate not only on the pharmacologic therapy of the woman but also on the social and psychologic characteristics that place her and her unborn child at risk This book is an attempt to bring together clinicians and researchers who have been active in developing programs for the recognition and management of the chemically dependent pregnant woman and her newborn The contributions of the multiple disciplines which the authors represent emphasize the need for a multifactorial approach to the problems of drug use and abuse during pregnancy It is hoped that through this type of approach a better future for substance exposed infants innocent bystanders in the process of addiction can be assured Ira J Chasnoff vii Contributing Authors I J CHASNOFF MD W **Directory, On-going Research in Smoking and Health ,**
