Women and the Environment Sally Sontheimer, 1991 Increasingly over the last 20 years women in poor developing countries have had to cope with growing ecological stress Food fodder wood and water previously in adequate supply have become scarce and women have also been deprived of traditional access to cultivable land Those who left the countryside for the cities now face terrible pollution miserable housing and poor sanitation and water supplies This reader

tells the rarely told story of women living and coping in these dreadful conditions It is a book of hope because it shows them to be not passive victims but courageous fighters and organizers in the face of natural disaster uncaring bureaucracy agencies and governments whose priorities lie elsewhere and traditional structures inimical to their needs The women and their organizations described here have produced demonstrably effective approaches for more sustainable uses of their resources and environments challenging conventional accounts of their roles **Women and Planning** Clara H.

Greed,2003-09-02 The first comprehensive history and analysis of women and the planning movement covering the philosophical practical and policy dimensions A central theme is how men have rewritten planning in their own image in creating modern urban space **Women and the Environment in the Third World** Irene Dankelman,Joan

Davidson,2013-11-05 This book should be issued to grass root organisations everywhere Doris Lessing The New Scientist It is must reading for government planners environmentalists and the ordinary layman Asia Week Women in the Third World play the major role in managing natural resources They are also the first and hardest hit by environmental mismanagement yet they are neither consulted nor taken into account by development strategists Irene Dankelman and Joan Davidson provide a clear account of the problems faced by women in the management of land water forests energy and human settlements They also describe the lack of response from international organizations With the help of well documented case studies they describe the ways in which women can organize to meet environmental social and economic challenges Originally published in 1988 *Inventing the Industrial Revolution* Christine MacLeod,2002-05-09 This book examines the development of the

English patent system and its relationship with technical change during the period between 1660 and 1800 when the patent system evolved from an instrument of royal patronage into one of commercial competition among the inventors and manufacturers of the Industrial Revolution It analyses the legal and political framework within which patenting took place and gives an account of the motivations and fortunes of patentees who obtained patents for a variety of purposes beyond the simple protection of an invention It includes the first in depth attempt to gauge the reliability of the patent statistics as a measure of inventive activity and technical change in the early part of the Industrial Revolution and suggests that the distribution of patents is a better guide to the advance of capitalism than to the centres of inventive activity It also queries the common assumption that the chief goal of inventors was to save labour and examines contemporary criticism of the patent system in the light of the changing conceptualisation of invention among natural scientists and political economists

Technology Assessment Janine Morgall,2010-05-05 How gender analysis should inform technology assessment

Technology Assessment Janine Morgall Traulsen,1993-10-14 How well does technology assessment TA relate to women's lives If women are underrepresented in the long term research and development process that leads to scientific advancements how can TA understand technology aimed at women It can't claim the author of Technology Assessment A Feminist Perspective A relative new field TA examines the social aspect of technology and provides information critical to

decision making policy development safety standards and avoiding litigation Until gender analysis is introduced into all assessments of new technologies Janine Marie Morgall argues TA can't evaluate technology's impact upon women Morgall investigates two areas of technology that affect women's lives productive clerical work and reproductive health care Case studies of clerical workers and health care recipients illustrate gender-specific effects of technology ranging from word processors to treatments for infertility These studies convincingly demonstrate that TA encourages innovations without questioning their effects on women Issues of dominance control and conflicting values emerge from Morgall's feminist perspective and support her call for gender analysis of new technologies In the series *Labor and Social Change* edited by Paula Rayman and Carmen Sirianni *Women's Utopias in British and American Fiction* Nan Bowman Albinski, 2019-11-21 Utopian writing offers a fascinating panorama of social visions and the related forms of dystopia and anti-utopian satire extend this into the range of social nightmares Originally published in 1988 this comparative study of utopian fiction by British and American women writers demonstrates the continuity of a well-established but little-known tradition emphasising its range and diversity and providing ample evidence of women's aspirations and documenting the restrictions and exclusions in private and public life that their novels challenge Historically the growth of each national tradition is traced in relation to social and political movements particularly the suffrage movement and contemporary feminism Comparatively the quite different responses of British and American women to what are in many instances the same social problems are examined in the light of changing expectations Definitions of human nature and gender relationships are assessed on a nature-culture continuum as a means of understanding this change Women's attitudes to their social and political roles their working lives to sexuality marriage and the family are reflected in their visions of fruitful change and so also is the impact of two world wars socialism and fascism the debate on peaceful uses of nuclear energy and fears of a nuclear holocaust *Women's Employment and the Capitalist Family* Ben Fine, 2002-01-31 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **Music Education as Critical Theory and Practice** Lucy Green, 2017-07-05 This collection of previously published articles chapters and keynotes traces both the theoretical contribution of Lucy Green to the emergent field of the sociology of music education and her radical hands-on practical work in classrooms and instrumental studios The selection contains a mixture of material from essays that have appeared in major journals and books to some harder to find publications It spans issues from musical meaning ideology identity and gender in relation to music education to changes and challenges in music curricula and pedagogy and includes Green's highly influential work on bringing informal learning into formal music education settings A newly written introduction considers the relationship between theory and practice and situates each essay in relation to some of the major influences within and beyond the field of music education which affected Green's own intellectual journey from the 1970s to the present day **Feminine Frequencies** Kate Lacey, 1996 Provides the first sustained historical account of the Frauenfunk women's radio programming in Weimar and Nazi Germany

Von Tunzelmann, 1995-01-01 What has dictated the rate and direction of technological change How central has it been to industrial progress How has it related to other determinants of economic growth and development In *Technology and Industrial Progress* Dr von Tunzelmann examines theoretical views on the nature and contribution of technology and the empirical evidence from the major industrializing countries from the 18th century to the present day The experiences of countries regarded in their time as the leaders of industrialization Britain in the 18th century the United States in the 19th century and Japan in the 20th century are critically compared by the author The following chapters study the transfer of each of these patterns of technology and growth to later industrializers such as continental Europe the Soviet Union and today s newly industrializing countries Adopting approaches drawn from evolutionary economics Dr von Tunzelmann links micro level phenomena relating to individual firms and technologies to macro level outcomes as reflected in economic growth and development This long awaited book is exceptional both in the range of countries surveyed and the breadth of topics analysed encompassing changes in production processes products and marketing management and finance

Limited Livelihoods Sonya O. Rose, 2003-09-02 Integrating analytical tools from feminist theory cultural studies and sociology to illuminate detailed historical evidence Sonya Rose argues that gender was a central organizing principle of the nineteenth century industrial transformation in England She elaborates a cultural theory of gender that suggests why it is an inherent aspect of all social and economic relations Analysing employer strategies and state policies and the role of work in family life she demonstrates that neither industrial transformation nor class relations can be understood when reduced to gender neutral and abstract forces
