*The Lever of Riches* Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain

and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

**Duende** Quincy Troupe, 2022-07-26 The selected poems from over fifty years by the great poet and biographer and friend of Miles Davis Quincy Troupe writes poetry in great waves The words are just notes It s the music you make with them that matters He s not a wordsmith he s a shaman conjuring long repetitive lines cadences of looking across the sea towards Africa and haunted by the legacy of slavery and racism or of remembering fellow conjurers poets and musical artists celebrating always celebrating but never only that In the fifty page incantatory poem Ghost Voices there is a longing to be reconnected to the past and a longing too to be free of it In the short title poem Duende For Garc a Lorca and Miles Davis there lies nakedly Troupe s credo secrets mystery infused in black magic that enters bodies in forms of music art poetry imbuing language with sovereignty in blood spooling back through violent centuries The version of the great poem Avalanche number 3 that appears here is different from the version of the same poem he published nearly 25 years ago in exactly the same way that a jazz artist picks up his horn to play the same song a little differently every time Troupe is a generous and gregarious poet in this giant offering that includes many new poems as well as a selection chosen from across his eleven previously published volumes What s remarkable is the constancy the energy and how he s always looking right at you in the here and now and at the same time sees something over your shoulder that others don t see yet maybe a distant storm gathering over the waters something we re going to need to rise up and face soon enough
