The book is the most complete and thorough assessment of Giddens' work currently available. It incorporates insights from many different perspectives into his theory of structuration, his work on the formation of cultural identities, and the fate of the nation-state. This fa

Social Acceleration Hartmut Rosa,2013-05-14 Hartmut Rosa

advances an account of the temporal structure of society from the perspective of critical theory He identifies in particular three categories of change in the tempo of modern social life technological acceleration evident in transportation communication and production the acceleration of social change reflected in cultural knowledge social institutions and personal relationships and acceleration in the pace of life which happens despite the expectation that technological change should increase an individual's free time According to Rosa both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present a decreasing time period during which expectations based on past experience reliably match future results and events When this phenomenon combines with technological acceleration and the increasing pace of life time seems to flow ever faster making our relationships to each other and the world fluid and problematic It is as if we are standing on slipping slopes a steep social terrain that is itself in motion and in turn demands faster lives and technology As Rosa deftly shows this self reinforcing feedback loop fundamentally determines the character of modern life

Colonialism and Modern Social Theory Gurminder K. Bhambra, John Holmwood, 2021-05-18 Modern society emerged in the context of European colonialism and empire So too did a distinctively modern social theory laying the basis for most social theorising ever since Yet colonialism and empire are absent from the conceptual understandings of modern

society which are organised instead around ideas of nation state and capitalist economy Gurminder K Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel the authors go on to focus on the work of Tocqueville Marx Weber Durkheim and Du Bois As well as unpicking critical omissions and misrepresentations the chapters discuss the places where colonialism is acknowledged and discussed albeit inadequately by these founding figures and we come to see what this fresh rereading has to offer and why it matters This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought its limitations and its wider possibilities *Modernity in Indian Social Theory* A.
