Social Change in Melanesia Paul Sillitoe, 2000-04-13 This book first published in 2000 is a companion volume to An Introduction to the Anthropology of Melanesia 1998 It gives a clear and absorbing account of social change in Melanesia since the arrival of Europeans covering the history of the colonial period and the new postcolonial states Paul Sillitoe deals with economic and technological change labour migration and urbanisation and formation of the modern state but he also describes the sometimes violent reactions to these dramatic transformations in the form of cargo cults secession movements and insurrections against multinational companies He discusses development projects but brings out associated policy dilemmas reviews developments that threaten the environment and implications for local identity such as romanticises primitive culture This fascinating account of social change in the pacific is addressed to students with little or no background in the region s history and development

Rethinking Development Geographies Marcus Power, 2004-08-02 Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and

the view from the South      **Social Change and Development** Alvin Y. So,1990-03 During the past four decades the field of development has been dominated by three schools of research The 1950s saw the modernization school the 1960s experienced the dependency school the 1970s developed the new world system school and the 1980s is a convergence of all three schools Alvin Y So examines the dynamic nature of these schools of development what each of them represents their contributions how they have criticized each other how they have defended themselves and how they were transformed He reviews a variety of empirical studies focusing on the classical and the new models to show how each of the perspectives affects the study of development In addition this book features a unique emphasis on the research implications of the three perspectives involving changes in orientation agenda methodology and findings      *Routledge Library Editions: Higher Education* Various,2021-03-29 The volumes in this set originally published between 1964 and 2002 draw together research by leading academics in the area of higher education and provide a rigorous examination of related key issues The volume examines the concepts of learning teaching student experience and administration in relation to the higher education through the areas of business sociology education reforms government educational policy business and religion whilst also exploring the general principles and practices of higher education in various countries This set will be of particular interest to students and practitioners of education politics and sociology      **Democracy and Development** R.C. Bhardwaj,K. Vijayakrishnan,2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter      *Psychology and the Developing World* Stuart C.

**Development and Social Change** Philip McMichael, 2016-01-25 The author is a proud sponsor of the 2020 SAGE Keith Roberts Teaching Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop In this new Sixth Edition of Development and Social Change A Global Perspective author Philip McMichael describes a world undergoing profound social political and economic transformations from the post World War II era through the present He tells a story of development in four parts colonialism developmentalism globalization and sustainability that shows how the global development project has taken different forms from one historical period to the next Throughout the text the underlying conceptual framework is that development is a political construct created by dominant actors states multilateral institutions corporations and economic coalitions and based on unequal power arrangements While rooted in ideas about progress and prosperity development also produces crises that threaten the health and well being of millions of people and sparks organized resistance to its goals and policies Frequent case studies make the intricacies of globalization concrete meaningful and clear Development and Social Change A Global Perspective challenges us to see ourselves as global citizens even as we are global consumers Contributor to the SAGE Teaching Innovations and Professional Development Award Find out more at [www.sagepub.com/sociologyaward](http://www.sagepub.com/sociologyaward)

**Fierce Climate, Sacred Ground** Elizabeth Marino, 2015-09-15 With three roads and a population of just over 500 people Shishmaref Alaska seems like an unlikely center of the climate change debate But the island home to Iupiaq Eskimos who still live off subsistence harvesting is falling into the sea and climate change is at least in part to blame While countries sputter and stall over taking environmental action Shishmaref is out of time Publications from the New York Times to Esquire have covered this disappearing village yet few have taken the time to truly show the community and the two millennia of traditions at risk In Fierce Climate Sacred Ground Elizabeth Marino brings Shishmaref into sharp focus as a place where people in a close knit determined community are confronting the realities of our changing planet every day She shows how physical dangers challenge lives while the stress and uncertainty challenge culture and identity Marino also draws on Shishmaref's experiences to show how disasters and the outcomes of climate change often fall heaviest on those already burdened with other social risks and often to communities who have contributed least to the problem Stirring and sobering Fierce Climate Sacred Ground proves that the consequences of unchecked climate change are anything but theoretical

**US Foreign Policy in World History** David Ryan, 2000 A survey of US foreign relations and its perceived crusade to spread liberty and democracy in the two hundred years since the American Revolution It is structured around central episodes and ideas in the

history of US foreign policy      **The Ancient Mediterranean Sea in Modern Visual and Performing Arts** Rosario Rovira Guardiola, 2017-12-14 When thinking about the Mediterranean Fernand Braudel's haunting words resound like an echo of the sea and its millenary history From Prehistory until today the Mediterranean has been setting witness and protagonist of mythical adventures of encounters with the Other of battles and the rise and fall of cultures and empires of the destinies of humans Braudel's appeal for a long duration history of the Mediterranean challenged traditional views that often present it as a sea fragmented and divided through periods This volume proposes a journey into the bright and dark sides of the ancient Mediterranean through the kaleidoscopic gaze of artists who from the Renaissance to the 21st century have been inspired by its myths and history The view of those who imagined and recreated the past of the sea has largely contributed to the shaping of modern cultures which are inexorably rooted and embedded in Mediterranean traditions The contributions look at modern visual reinterpretations of ancient myths fiction and history and pay particular attention to the theme of sea travel and travellers which since Homer's Odyssey has become the epitome of the discovery of new worlds of cultural exchanges and a metaphor of personal developments and metamorphoses      **Geographies of Myth and Places of Identity** Marco Benoît Carbone, 2022-01-13 Turning to a region of South Italy associated with Greater Greece and the geographies of Homer's Odyssey Marco Benoit Carbone delivers a historical and ethnographic treatment of how places defined in public imagination and media by their associated histories become sites of memory and identity as their landscape and mythologies turn into insignia of a romanticised antiquity For the ancient Greeks Homer had set the marine monsters of the Odyssey in the Strait between Calabria and Sicily Since then this passage has been glowing with the aura of its mythological landmarks Travellers and tourists have played Odysseus by re-enacting his journey Scholars and explorers have explained the myths as metaphors of whirlpools and marine fauna The iconic Strait and village of Scilla have turned into place myths and playgrounds defined by the region's heritage Carbone observes the enduring impact of Hellas on the real Strait today The continuous rekindling of cultural and visual traditions of place in the arts media travel and tourism have intersected with philhellenic historiographies shaping local policies public histories views of development and forms of Hellenicist identitarianism Elements of society have celebrated the landscape of the Odyssey appropriated Homer as their imagined heirs and purported themselves as the original Europeans pandering to outdated ideological appropriations of classical antiquity and exclusionary West-centric views of the Mediterranean
