*Barnstorming the Prairies* Jason Weems, 2015-12-29 To Midwesterners tucked into small towns or farms early in the twentieth century the landscape of the American heartland reached the horizon and then imagination had to provide what lay beyond But when aviation took off and scenes of the Midwest were no longer earthbound the Midwestern landscape was transformed and with it Jason Weems suggests in this book the very idea of the Midwest itself *Barnstorming the Prairies* offers a panoramic vista of the transformative nature and power of the aerial vision that remade the Midwest in the wake of the airplane This new perspective from above enabled Americans to conceptualize the region as something other than isolated and unchanging and to see it instead as a dynamic space where people worked to harmonize the core traditions of America s agrarian character with the more abstract forms of twentieth century modernity In the maps and aerial survey photography of the Midwest as well as the painting cinema animation and suburban landscapes that arose through flight Weems also finds a different and provocative view of modernity in the making In representations of the Midwest from Grant Wood s iconic images to the Prairie style of Frank Lloyd Wright to the design of greenbelt suburbs Weems reveals aerial vision s fundamental contribution to regional identity to Midwesternness as we understand it Reading comparatively across these images Weems explores how the cognitive and perceptual practices of aerial vision helped to resymbolize the Midwestern landscape amid the technological change and social uncertainty of the early twentieth century

**The Economic Aspect of the Abolition of**

**the West Indian Slave Trade and Slavery** Eric Williams, 2014-02-07 In his influential and widely debated *Capitalism and Slavery* Eric Williams examined the relation of capitalism and slavery in the British West Indies Binding an economic view of history with strong moral argument his study of the role of slavery in financing the Industrial Revolution refuted traditional ideas of economic and moral progress and firmly established the centrality of the African slave trade in European economic development He also showed that mature industrial capitalism in turn helped destroy the slave system Establishing the exploitation of commercial capitalism and its link to racial attitudes Williams employed a historicist vision that has set the tone for an entire field Williams s profound critique became the foundation for studies of imperialism and economic development and has been widely debated since the book s initial publication in 1944 *The Economic Aspect of the Abolition of the West Indian Slave Trade and Slavery* now makes available in book form for the first time his dissertation on which *Capitalism and Slavery* was based The significant differences between his two works allow us to rethink questions that were considered resolved and to develop fresh problems and hypotheses It offers the possibility of a much deeper reconsideration of issues that have lost none of their urgency indeed whose importance has increased

**Cities and Nature in the American West** Char Miller, 2010-09-28 In less than a century the American West has transformed from a predominantly rural region to one where most people live in metropolitan centers *Cities and Nature in the American West* offers provocative analyses of this transformation Each essay explores the intersection of environmental urban and western history providing a deeper understanding of the complex processes by which the urban West has shaped and been shaped by its sustaining environment The book also considers how the West s urban development has altered the human experience and perception of nature from the administration and marketing of national parks to the consumer roots of popular environmentalism the politics of land and water use and the challenges of

environmental inequities A number of essays address the cultural role of wilderness nature and such activities as camping Others examine the increasingly pervasive power of the West's urban areas and urbanites to redefine the very foundations and future of the American West *Unveiling Modernity in Twentieth-Century West African Islamic Reforms* Ousman Murzik Kobo, 2012-08-27 In this book Ousman Kobo provides a fresh understanding of the indigenous origins of Islamic reforms sympathetic to Wahhabi ideas in two West African countries Burkina Faso and Ghana and connects these movements to Muslim's search for religious purity in modern contexts *Politics, Property and Production in the West African Sahel* Tor Arve Benjaminsen, Christian Lund, 2001 Through a number of case studies from the West African Sahel this book links and explores natural resources management from the perspectives of politics property and production **Resources in Education**, 1999 **An Introduction to Contemporary Civilization in the West** Columbia University, 1928

**Absentee Landowning and Exploitation in West Virginia, 1760-1920** Barbara Rasmussen, 2014-07-11 Absentee landowning has long been tied to economic distress in Appalachia In this important revisionist study Barbara Rasmussen examines the nature of landownership in five counties of West Virginia and its effects upon the counties economic and social development Rasmussen untangles a web of outside domination of the region that commenced before the American Revolution creating a legacy of hardship that continues to plague Appalachia today The owners and exploiters of the region have included Lord Fairfax George Washington and most recently the U S Forest Service The overarching concern of these absentee landowners has been to control the land the politics the government and the resources of the fabulously rich Appalachian Mountains Their early and relentless domination of politics assured a land tax system that still favors absentee landholders and simultaneously impoverishes the state Class differences a capitalistic outlook and an ethic of growth and development pervaded western Virginia from earliest settlement Residents however were quickly outspent by wealthier more powerful outsiders Insecurity in landownership Rasmussen demonstrates is the most significant difference between early mountain farmers and early American farmers everywhere *Promised Lands* David M. Wrobel, 2002 Whether seen as a land of opportunity or as paradise lost the American West took shape in the nation's imagination with the help of those who wrote about it but two groups who did much to shape that perception are often overlooked today Promoters trying to lure settlers and investors to the West insisted that the frontier had already been tamed that the only frontiers remaining were those of opportunity Through posters pamphlets newspaper articles and other printed pieces these boosters literally imagined places into existence by depicting backwater areas as settled culturally developed regions where newcomers would find none of the hardships associated with frontier life Quick on their heels some of the West's original settlers had begun publishing their reminiscences in books and periodicals and banding together in pioneer societies to sustain their conception of frontier heritage Their selective memory focused on the savage wilderness they had tamed exaggerating the past every bit as much as promoters exaggerated the present Although they are generally seen today as unscrupulous charlatans and

tellers of tall tales David Wrobel reveals that these promoters and reminiscers were more significant than their detractors have suggested By exploring the vast literature produced by these individuals from the end of the Civil War through the 1920s he clarifies the pivotal impact of their works on our vision of both the historic and mythic West In examining their role in forging both sense of place within the West and the nation s sense of the West as a place Wrobel shows that these works were vital to the process of identity formation among westerners themselves and to the construction of a West in the national imagination Wrobel also sheds light on the often elitist sometimes racist legacies of both groups through their characterizations of Native Americans African Americans Mexican Americans and Asian Americans In the era Wrobel examines promoters painted the future of each western place as if it were already present while the old timers preserved the past as if it were still present But as he also demonstrates that West has not really changed much promoters still tout its promise while old timers still try to preserve their selective memories Even relatively recent western residents still tap into the region s mythic pioneer heritage as they form their attachments to place Promised Lands shows us that the West may well move into the twenty first century but our images of it are forever rooted in the nineteenth     *Industry and Politics in West Germany* Peter J. Katzenstein, 2018-08-06 Dynamic technological developments in industrial production the rise of new social movements in national politics and great changes in the international political economy have left a deep imprint on the Federal Republic A compelling explanation of West Germany s success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change Whereas studies in political economy have typically focused on one level of political action either the shop floor or national politics or the international system this innovative account analyzes the interaction of change at all three levels bringing together case studies drawn from six manufacturing and service sectors     *Utilization, Misuse, and Development of Human Resources in the Early West Indian Colonies* M.K. Bacchus, 2006-01-01 This comprehensive study of the development of education in the West Indies between 1492 and 1854 examines the shifts which occurred within the nature of the education programs provided for the masses Believing existing theories of educational change are too limiting Bacchus has blended detailed analysis of such important factors as the changing role of the state the conflicting educational objectives among the dominant groups and their differences with the missionary societies providing popular education to better understand how these changes came about He attributes greater importance to the role of the masses who increasingly asserted their views about the type of education they wanted for their children The book demonstrates how instructional programs developed in the West Indies not as the result of a rational curriculum development process but rather through a series of compromises made to accommodate the views of various influential groups Education and

curriculum evolved by way of a show yet constant changing dialectical process Such an insightful work will arouse the interest of scholars and students of educational development particularly those studying the West Indies **External Research. *Trafficking with Demons* explores how magic was perceived practiced and prohibited in western Europe during the first millennium CE Through the overlapping frameworks of religion ritual and gender Martha Rampton connects early Christian reckonings with pagan magic to later doctrines and dogmas Challenging established views on the role of women in ritual magic during this period Rampton provides a new narrative of the ways in which magic was embedded within the foundational assumptions of western European society informing how people understood the cosmos divinity and their own Christian faith As Rampton shows throughout the first Christian millennium magic was thought to play a natural role within the functioning of the universe and existed within a rational cosmos hierarchically arranged according to a great chain of being Trafficking with the demons of the lower air was the essence of magic Interactions with those demons occurred both in highly formalistic ritual settings and on a routine and casual basis Rampton tracks the competition between pagan magic and Christian belief from the first century CE when it was fiercest through the early Middle Ages as atavistic forms of magic mutated and found sanctuary in the daily habits of the converted peoples and new paganisms entered Europe with their own forms of magic By the year 1000 she concludes many forms of magic had been tamed and were by the reckoning of the elite essentially ineffective as were the women who practiced it and the rituals that attended it **Politics and Society in the Developing World** Mehran Kamrava,2012-10-12 This book is a welcome new edition which completely updates and revises the very popular first edition Politics and Society in the Third World Mehran Kamrava has brought the book in line with the major changes in global politics and the politics and social issues of the developing world The book examines key issues such as democratisation civil society organisations and NGOs political society state collapse democratic bargains and transition consolidation and problems of legitimacy elections multi party politics industrial development dependency theory and globalisation the roles of the IMF and the World Bank the GATT and other multinational institutions urbanisation social change the increasing influence of western values capital and institutions urbanisation social change the increasing influence of western values capital and institutions political culture its role and impact in newly democratic developing countries revolution and gives more examples from Africa East Asia and rural societies
