Social Construction Of The Korean War Conflict And Its Possibilities:

The Social Construction of the Korean War Jennifer Milliken, 2001 In light of the recent declassification of state papers from Western Soviet and Chinese archives this intriguing book presents a re examination of the Korean War The authors present a revealing analysis of North Korea s decision to invade South Korea in June of 1950 Soviet and American foreign policy during the war and Chinese intervention The book also shows how the standard explanations of the war in international relations theory inherited from foundational approaches are misleading or incomplete *The Power of Emotions in World Politics* Simon Koschut, 2020-02-14 This book argues that the link between emotions and discourse provides a new and promising framework to theorize and empirically analyse power relationships in world politics Examining the ways in which discourse evokes reveals and engages emotions the expert contributors argue that emotions are not irrational forces but have a pattern to them that underpins social relations However these are also power relations and their articulation as socially constructed ways of feeling and expressing emotions represent a key force in either sustaining or challenging the social order This volume goes beyond the emotions matter approach to offer specific ways to integrate the consideration of emotion into existing research It offers a novel integration of emotion discourse and power and shows how emotion discourses establish assert challenge or reinforce power and status difference It will be particularly useful to university researchers doctoral candidates and advanced students engaged in scholarship on emotions and discourse analysis in International Relations

Painful Choices David A. Welch,2011-06-27 Under what conditions should we expect states to do things radically differently all of a sudden In this book David Welch seeks to answer this question constructing a theory of foreign policy change inspired by organization theory cognitive and motivational psychology and prospect theory He then test drives the theory in a series of comparative case studies in the security and trade domains Argentina's decision to go to war over the Falklands Malvinas vs Japan's endless patience with diplomacy in its conflict with Russia over the Northern Territories America's decision to commit large scale military force to Vietnam vs its ultimate decision to withdraw and Canada's two abortive flirtations with free trade with the United States in 1911 and 1948

vs its embrace of free trade in the late 1980s Painful Choices has three main objectives to determine whether the general theory project in the field of international relations can be redeemed given disappointment with previous attempts to reflect on what this reveals about the possibilities and limits of general theory and to inform policy Welch argues that earlier efforts at general theory erred by aiming to explain state behavior which is an intractable problem Instead since inertia is the default expectation in international politics all we need do is to explain changes in behavior Painful Choices shows that this is a tractable problem with clear implications for intelligence analysts and negotiators *Security as Practice* Lene

Hansen,2013-04-03 This important text offers a full and detailed account of how to use discourse analysis to study foreign policy It provides a poststructuralist theory of the relationship between identity and foreign policy and an in depth discussion of the methodology of discourse analysis Part I offers a detailed discussion of the concept of identity the intertextual relationship between official foreign policy discourse and oppositional and media discourses and of the importance of genres for authors ability to establish themselves as having authority and knowledge Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war This analysis includes a historical genealogy of the Western construction of the Balkans as well as readings of the official British and American policies the debate in the House of Commons and the US Senate Western media representations academic debates and travel writing and autobiography Providing an introduction to discourse analysis and critical perspectives on international relations this book will be essential reading for students and scholars of international relations discourse analysis and research methodology **International Law and the Cold War** Matthew Craven,Sundhya Pahuja,Gerry Simpson,Anna

Saunders,2020 This is the first book to examine in detail the relationship between the Cold War and International Law

Interpretation and Method Dvora Yanow,Peregrine Schwartz-Shea,2015-03-04 Exceptionally clear and well written chapters provide engaging discussions of the methods of accessing generating and analyzing social science data using methods ranging from reflexive historical analysis to critical ethnography Reflecting on their own research experiences the contributors offer an inside applied perspective on how research topics evidence and methods intertwine to produce knowledge in the social sciences **Truman, Congress, and Korea** Larry Blomstedt,2016-01-08 Three days after North

Korean premier Kim Il Sung launched a massive military invasion of South Korea on June 24 1950 President Harry S Truman responded dispatching air and naval support to South Korea Initially Congress cheered his swift action but when China entered the war to aid North Korea the president and many legislators became concerned that the conflict would escalate into another world war and the United States agreed to a truce in 1953 The lack of a decisive victory caused the Korean War to quickly recede from public attention However its impact on subsequent American foreign policy was profound In Truman Congress and Korea The Politics of America s First Undeclared War Larry Blomstedt provides the first in depth domestic

political history of the conflict from the initial military mobilization to Congress's failed attempts to broker a cease fire to the political fallout in the 1952 election During the war President Truman faced challenges from both Democratic and Republican legislators whose initial support quickly collapsed into bitter and often public infighting For his part Truman dedicated inadequate attention to relationships on Capitol Hill early in his term and also declined to require a formal declaration of war from Congress advancing the shift toward greater executive power in foreign policy The Korean conflict ended the brief period of bipartisanship in foreign policy that began during World War II It also introduced Americans to the concept of limited war which contrasted sharply with the practice of requiring unconditional surrenders in previous conflicts Blomstedt's study explores the changes wrought during this critical period and the ways in which the war influenced US international relations and military interventions during the Cold War and beyond Constructing Global Enemies Eva Herschinger, 2010-11-30 Examines efforts to counteract terrorism at the international level and drug prohibition policies

Sino-US Relations and the Role of Emotion in State Action T. Shepperd, 2015-12-04 Examining twenty first century relations between the US and China Shepperd investigates three well publicised crises between these states highlighting how social interests relating to identity and emotional needs were key dynamics driving these interactions and their transformation **2001** Massimo Mastrogregori, 2011-08-02 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors **US Taiwan Policy** Øystein Tunsjø, 2008-02-18 The relationship between the United States and China is one of the most important issues in the twenty first century and is ultimately hostage to conditions across the Taiwan Strait This book is the first to attempt to trace the historical origin of what is known as the Taiwan issue in US China relations from a constructivist perspective based on detailed archival research The analysis used supplements the mainstream rationalist approach by developing a new theoretical perspective on US Taiwan policy that incorporates constructivism's emphasis on identity norms and discourse analysis Scholars have never previously developed or elaborated upon this approach to any significant extent The book re-examines the protection of Taiwan by military means following the outbreak of the Korean War and the establishment of the one China policy in relation to the process of rapprochement during President Nixon's first term in office It also considers the contemporary challenges posed to the one China policy by the increased importance of promoting human rights and democracy in US foreign policy arguing that the current US China policy is guided by a new strategy based on engagement plus hedging Constructing America's Freedom Agenda for the Middle East Oz Hassan, 2013 This book explores how George W Bush's Freedom Agenda for the Middle East and North Africa was conceived and implemented as an American

national interest from the Bush era right through to the initial stages of the Obama administration It highlights how the crisis presented by September 11 2001 led to regime change in Afghanistan and Iraq but more broadly how American policy towards the region had a softer imperial side which drew on broader economic theories of democratisation and modernisation The Freedom Agenda contained within it a prescribed method of combating terrorism but also a method of engaging with and reforming the entire Middle East region more broadly with many institutions seeking to use the opportunity to implement neo liberal market logics in the region Constructing America's Freedom Agenda for the Middle East highlights the particular understanding of freedom that underpins America's imperial project in the region a project trapped between a policy of democratisation and domination This book analyses the Freedom Agenda in significantly more depth than in available current literature and would be of interest to students and researchers of global politics and international foreign policy of recent years

The Postwar Legacy of Appeasement R. Gerald Hughes, 2014-01-16

Focusing on the Cold War and the post Cold War eras R Gerald Hughes explores the continuing influence of Appeasement on British foreign policy and re evaluates the relationship between British society and Appeasement both as historical memory and as a foreign policy process The Postwar Legacy of Appeasement explores the reaction of British policy makers to the legacies of the era of Appeasement the memory of Appeasement in public opinion and the media and the use of Appeasement as a motif in political debate regarding threats faced by Britain in the post war era Using many previously unpublished archival sources this book clearly demonstrates that many of the core British beliefs and cultural norms that had underpinned the Chamberlainite Appeasement of the 1930s persisted in the postwar period

Constructions of European Identity Senem Ayd?n-Düzgit, 2012-12-15 This book examines EU discourses on Turkey in the European Commission European Parliament and three EU member states France Germany and Britain to reveal the discursive construction of European identity through EU representations of Turkey Based on a poststructuralist framework that conceptualizes identity as discursively constructed through difference the book applies Critical Discourse Analysis to the analysis of texts and argues that there are multiple Europe's that are constructed in talks over the enlargement of Turkey varying within and between different ideological national and institutional contexts The book discerns four main discourse topics over which these Europe's are constructed corresponding to the conceptualization of Europe as a security community as an upholder of democratic values as a political project and as a cultural space The book argues that Turkey constitutes a key case in exploring various discursive constructs of European identity since the talks on Turkey pave the way for the construction of different versions of Europe in discourse

The International in Security, Security in the International Pinar Bilgin, 2016-07-15

International Relations continues to come under fire for its relative absence of international perspectives In this exciting new volume Pinar Bilgin encourages readers to consider both why and how non core geocultural sites allow us to think differently about key aspects of global politics Seeking to further debates surrounding thinking beyond the West

non West divide this book analyzes how scholarship on and conceptions of the international outside core contexts are tied up with peripheral actors search for security Accordingly Bilgin looks at core periphery dynamics not only in terms of the production of knowledge in the production of IR scholarship or material threats but also peripheral actors conceptions of the international in terms of standard of civilization and their more contemporary guises which she terms as hierarchy in anarchical society The first three chapters provide a critical overview of the limits of our theorizing about IR and security as well as a discussion on the track record of critical approaches to IR and security in addressing those limits The following three chapters offer one way of addressing the limits of our theorizing about IR and security by inquiring into the international in security security in the international Each of these chapters makes a theoretical point and illustrates this further in a spotlight section that further illustrates the point to aid student learning A genuinely innovative contribution to this rapidly emerging field within IR this book is essential reading for students and scholars of critical security international relations theory and Global IR
