

SOCIOLOGY VS ANTHROPOLOGY

SOCIOLOGY

Sociology is the scientific study of human society, social relationships, and the patterns of social behavior. It examines how individuals and groups interact, the formation of social institutions, and the influence of social structures on people's lives. Sociology aims to understand issues of inequality, power, culture, and social change.

ANTHROPOLOGY

Anthropology is the study of humans, past and present, in their cultural, social, and biological contexts. It seeks to understand the diversity of human cultures, beliefs, practices, and behavior across time and space. Anthropologists employ methods such as participant observation, ethnography, and archaeology to explore human cultures.

The Life of the Law Laura Nader, 2002-02-28 Laura Nader an instrumental figure in the development of the field of legal anthropology investigates an issue of vital importance for our time the role of the law in the struggle for social and economic justice In this book she gives an overview of the history of legal anthropology and at the same time urges anthropologists lawyers and activists to recognize the centrality of law in social change Nader traces the evolution of the plaintiff s role in the United States in the second half of the twentieth century and passionately argues that the atrophy of the plaintiff s power during this period represents a profound challenge to justice and democracy Taking into account the vast changes wrought in both anthropology and the law by globalization Nader speaks to the increasing dominance of large business corporations and the prominence of neoliberal ideology and practice today In her discussion of these trends she considers the rise of the alternative dispute resolution movement which since the 1960s has been part of a major overhaul of the U S judicial system Nader links the increasing popularity of this movement with the erosion of the plaintiff s power and suggests that mediation as an approach to conflict resolution is structured to favor powerful often corporate interests

Anthropology and Law James M. Donovan, H. Edwin Anderson, 2005-12 The relationship between Law and Anthropology can be considered as having been particularly intimate In this book the authors defend their assertion that the two fields co exist in a condition of balanced reciprocity wherein each makes important contributions to the successful practice and theory of the other Anthropology for example offers a cross culturally validated generic concept of law and clarifies other important

legal concepts such as religion and human rights Law similarly illuminates key anthropological ideas such as the social contract and provides a uniquely valuable access point for the analysis of sociocultural systems Legal practice renders a further important benefit to anthropology when it validates anthropological knowledge through the use of anthropologists as expert witnesses in the courtroom and the introduction of the culture defense against criminal charges Although the actual relationship between anthropology and law today falls short of this idealized state of balanced reciprocity the authors include historical and other data suggesting that that level of intimate cooperation draws ever closer

Legal Theory and the Social Sciences Maksymilian Del Mar, Michael Giudice, 2017-07-05 Ever since H L A Hart's self description of The Concept of Law as an exercise in descriptive sociology contemporary legal theorists have been debating the relationship between legal theory and sociology and between legal theory and social science more generally There have been some who have insisted on a clear divide between legal theory and the social sciences citing fundamental methodological differences Others have attempted to bridge gaps revealing common challenges and similar objects of inquiry Collecting the work of authors such as Martin Krygier David Nelken Brian Tamanaha Lewis Kornhauser Gunther Teubner and Nicola Lacey this volume the second in a three volume series provides an overview of the major developments in the last thirty years The volume is divided into three sections each discussing an aspect of the relationship of legal theory and the social sciences 1 methodological disputes and collaboration 2 common problems especially as they concern different modes of explanation of social behaviour and 3 common objects including most prominently the study of language in its social context and normative pluralism

Morals of Legitimacy Italo Pardo, 2001-01-01 With the growing fragmentation of western societies and disillusionment with the political process the question of legitimacy has become one of the key issues of contemporary politics and is examined in this volume in depth for the first time Drawing on ethnographic material from the U S Europe India Japan and Africa anthropologists and legal scholars investigate the morally diversified definitions of legitimacy that co exist in any one society Aware of the tensions between state morality and community morality they offer reflections on the relationship between agency individual and collective and the legal and political systems In a situation in which politics has only too often degenerated into vacuous rhetoric this volume demonstrates how critical the relationship between trust and legitimacy is for the authoritative exercise of power in democratic societies

Personal Autonomy in Plural Societies Marie-Claire Foblets, Michele Graziadei, Alison Dundes Renteln, 2017-11-22 This volume addresses the exercise of personal autonomy in contemporary situations of normative pluralism In the Western liberal tradition from a strictly legal and theoretical perspective the social individual has the right to exercise the autonomy of his or her will In a context of legal plurality however personal autonomy becomes more complicated Can and should personal autonomy be recognized as a legal foundation for protecting a person's freedom to renounce what others view as his or her fundamental human rights This collection develops an interdisciplinary conceptual framework to address these questions and presents empirical studies examining the gap between the principle of personal autonomy and its implementation In a context of cultural diversity this gap manifests itself in two particular ways First not every culture gives the same pre-eminence to personal autonomy when examining the legal effects of an individual's acts Second in a society characterized by weak pluralism the legal assessment of personal autonomy often favours the views of the dominant majority In highlighting these diverse perspectives and problematizing the so-called guardian function of human rights i.e. purporting to protect weaker parties by limiting their personal autonomy in the name of gender equality fair trial etc this book offers a nuanced approach to the principle of autonomy and addresses the questions of whether it can effectively be deployed in situations of internormativity and what conditions must be met in order to ensure that it is not rendered devoid of all meaning
