Media, Process, and the Social Construction of Crime Gregg Barak, 2013-10-28 First published in 1995 One of the most pervasive forms of social control in our society is the mass media The public learns from television newspapers magazines movies and books what is happening in the world and how to interpret it The problem however is that full or complete interpretations of reality are not presented In short reality itself clear and unadorned is not to be found in the information provided by the media Instead media presentations consist of those various viewpoints that succeed in capturing the minds and imaginations of the masses or in terms of the 1992 presidential campaign that successfully put the winning spin on information Barak and others believe that criminologists should participate in the various media presentations of crime and justice By bringing their knowledge to bear on media presentations criminologists can help make some news more representative and less distorted of the social reality of crime

The Social Construction of Mental Illness and Its Implications for Neuroplasticity Michael T. Walker, 2016-09-14 The Social Construction of Mental Illness and Its Implications for Neuroplasticity examines how the current concept of mental illness in society informs the dialogic skills and perspectives of psychotherapists The common interpretation of unconventional behavior as a symptom of illness has marginalized the creative class and deterred mental health professionals from developing the skills and perspectives needed to empower their clients Too often the neuroplasticity of the human brain is ignored in favor of the organizing metaphor of chemical imbalance which often results in the relegation of clients needs to the pharmaceutical industry Michael T Walker encourages psychotherapists to evolve their practice by considering the new information available in neuroscience psychotherapy outcome studies and postmodern psychotherapies

The Communicative Construction of Reality Hubert Knoblauch, 2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger to a communicative constructivism that acknowledges communication as an embodied form of action in its own right according to which social actors in engaging in communicative action construct a material social reality that guides delimits and enables actions A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society The Communicative Construction of Reality shows how communication society does not merely replace modern society and its hierarchical institutions but complements it in a manner that continually results in conflicts leading to the refiguration of society As such it will appeal to scholars of sociology with interests in the sociology of knowledge communication and social theory

The Mediated Construction of Reality Nick Couldry, Andreas Hepp, 2018-03-15 Social theory needs to be completely rethought in a world of digital media and social media platforms driven by data processes Fifty years after Berger

and Luckmann published their classic text *The Social Construction of Reality* two leading sociologists of media Nick Couldry and Andreas Hepp revisit the question of how social theory can understand the processes through which an everyday world is constructed in and through media Drawing on Sch tz Elias and many other social and media theorists they ask what are the implications of digital medias profound involvement in those processes Is the result a social world that is stable and liveable or one that is increasingly unstable and unliveable

Social Construction of International Politics Ted Hopf,2002 In this deeply researched book Ted Hopf challenges contemporary theorizing about international relations He advances what he believes is a commonsensical notion a state s domestic identity has an enormous effect on its international policies Hopf argues that foreign policy elites are inextricably bound to their own societies in order to understand other states they must first understand themselves To comprehend Russian and Soviet foreign policy it is just as important to read what is being consumed on the Moscow subway as it is to conduct research in the Foreign Ministry archives the author says Hopf recreates the major currents in Russian Soviet identity reconstructing the identity topographies of two profoundly important years 1955 and 1999 To provide insights about how Russians made sense of themselves in the post Stalinist and late Yeltsin periods he not only uses daily newspapers and official discourse but also delves into works intended for mass consumption popular novels film reviews ethnographic journals high school textbooks and memoirs He explains how the different identities expressed in these varied materials shaped the worldviews of Soviet and Russian decisionmakers Hopf finds that continuous renegotiations and clashes among competing domestic visions of national identity had a profound effect on Soviet and Russian foreign policy Broadly speaking Hopf shows that all international politics begins at home
