Soviet Submarine Operations in Swedish Waters Milton Leitenberg, 1987-09-09 Milton Leitenberg has done us a great service His balanced and comprehensive reconstruction of the history of Soviet submarine operations in Swedish waters will benefit all students of Soviet policy and practice in Northern Europe The accompanying discussions of the domestic and international political contexts within which those submarine operations were perceived responded to and reported on doubles the value of the work The full Soviet military rationale for those operations may remain somewhat elusive but Leitenberg has clearly provided us with a cogent description of their political consequences Robert G Weinland Consultant Washington D C The book first presents a comprehensive account of the overall incidence of violations not only in Sweden but in other countries as well between 1970 and 1987 The author then shows that the provisional more exploratory stages of the operations in Sweden apparently began well before 1980 and have continued despite the Soviet Union's public campaign for a Nordic Nuclear Weapon Free Zone An analysis of the incursions is given next including a look at Sweden's response to a problem it may not have anticipated when its own preconceptions and the norms of international behavior were clearly contradicted by reality Also discussed are the motives behind the Soviet submarine operations and various provocation theories

The Secret War Against Sweden Ola Tunander, 2004-07-22 Ola Tunander's revelations make it clear that the United States and Britain ran a secret war in Swedish waters

Regionalism in the Post-Cold War World Stephen Calleya, 2018-03-29 This title was first published in 2000 This text describes analyzes and projects the implications of regionalism on contemporary international relations Regional policy positions are examined in order to increase our understanding of how the direct impact patterns of relations at a regional level of analysis are having in the shifting balance

of international power The book clarifies what types of regional dynamics are manifesting themselves in different parts of the world and consists of both theoretical and empirical assessments similar to those developed in the author's previous book on regionalism that ensures that the comparative analysis conducted is a comprehensive and coherent one

Small Powers at Sea Finn Laursen, 2021-09-27 Small Powers at Sea presents an analysis of the marine policies of Denmark Norway and Sweden from the First UN Conference on the Law of the Sea in 1958 until the conclusion of the Third UN Conference on the Law of the Sea in 1982 The main substantive chapters cover security aspects continental shelf policies fisheries shipping and marine environment as well as deep seabed mining The study is comparative and conducted from a political science perspective discussing how to explain the rather divergent Scandinavian marine policies A state centric rational actor model can explain much of the variance but other factors including cognitive ones and the role of domestic politics must be included to obtain a fuller understanding of Scandinavian policies over time and across issue areas

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it
