

THE SOVIET UNION AT WAR 1941-1945

EDITED BY
DAVID R. STONE

Soviet Union And The Outbreak Of War 1939 1941

Scott C. Dulebohn

Soviet Union And The Outbreak Of War 1939 1941:

The Soviet Union and the Origins of the Second World War Geoffrey C. Roberts, 1995-08-07 Historians have heatedly debated the Soviet role in the origins of the Second World War for more than 50 years At the centre of these controversies stands the question of Soviet relations with Nazi Germany and the Stalin Hitler pact of 1939 Drawing on a wealth of new material from the Soviet Archives this detailed and original study analyses Moscow s response to the rise of Hitler explains the origins of the Nazi Soviet pact and charts the road to Operation Barbarossa and the disaster of the surprise German attack on the USSR in June 1941 **The Concise Encyclopedia of World War II** Cathal J.

Nolan, 2010-04-22 A comprehensive and integrated military political and strategic history of World War II ranging from the daily life of conscripts and civilians to operational and strategic decision making at the highest levels Filled with up to date scholarship yet supremely manageable and accessible The Concise Encyclopedia of World War II offers the opportunity to explore a conflict that remains a source of fascination for scholars students and general readers alike From the battlefields to the corridors of power from the barracks to the home front The Concise Encyclopedia of World War II provides a complete portrait of the war Entries not only address major battles and campaigns but political economic and cultural issues as well plus brief portraits of the conflict s commanding personalities Its global perspective notably corrects the usual Western focus of World War II studies incorporating a wealth of information on often underreported topics such as the Eastern Front and the Sino Japanese War **The 1956 War** David Tal, 2001 Recently declassified documents and new scholarship have

prompted this reassessment of the collusion between Israel France and England which drove the 1956 War The book opens with the international aspects of the war deals with regional issues and concludes with a fresh look at Israeli involvement Issues such as the plot which paved the way to the eruption of hostilities Egyptian losses and gains and Soviet and American opposition come under scrutiny Publisher description **International History of the Twentieth Century** Antony

Best, 2004 Using their thematic and regional expertise four prominent authors have produced an authoritative yet accessible account of the history of international relations in the last century covering events in Europe Asia the Middle East Africa and the Americas **A Dictionary of 20th-Century Communism** Silvio Pons, Robert Service, 2022-04-12 An encyclopedic

guide to 20th century communism around the world The first book of its kind to appear since the end of the Cold War this indispensable reference provides encyclopedic coverage of communism and its impact throughout the world in the 20th century With the opening of archives in former communist states scholars have found new material that has expanded and sometimes altered the understanding of communism as an ideological and political force A Dictionary of 20th Century Communism brings this scholarship to students teachers and scholars in related fields In more than 400 concise entries the book explains what communism was the forms it took and the enormous role it played in world history from the Russian Revolution through the collapse of the Soviet Union and beyond Examines the political intellectual and social influences of

communism around the globe Features contributions from an international team of 160 scholars Includes more than 400 entries on major topics such as Figures Lenin Mao Stalin Ho Chi Minh Pol Pot Castro Gorbachev Events Cold War Prague Spring Cultural Revolution Sandinista Revolution Ideas and concepts Marxism Leninism cult of personality labor Organizations and movements KGB Comintern Gulag Khmer Rouge Related topics totalitarianism nationalism antifascism anticommunism McCarthyism Guides readers to further research through bibliographies cross references and an index

Britain After the Five Crises P. W. Preston, 2023-11-02 The period 2008-2022 has seen the British state government embroiled in a number of full blown crises each impacting the fundamental operations of the state and demanding therefore urgent responses from the government of the day In the first case the 2008 near collapse and partial nationalization of the banking system consequent upon decades of irresponsible credit creation coupled to permissive regulation in the second the migration crisis of 2015 which saw waves of refugees moving through Europe provoking anxious responses from European Union member states and opening up related political debates in Britain thus third the 2016 referendum in regard to membership of the European Union which the London based elite clearly thought they would navigate easily before to their evident shock losing an event itself precipitating further extraordinary Westminster manoeuvring and then fourth the 2020 Covid 19 pandemic met with an initial casual sangfroid before the government its actions informed by epidemiological modelling made an abrupt shift to lockdown with dramatic social and economic consequences To these episodes whose impacts run down to the present could be added fifth the 2022 disaster in Ukraine where the British state government has chosen to involve itself by supporting one set of combatants in a conflict where presently after more than a year of fighting there is little sign of a means to the resolution of the violence This book examines the crises and tracks how each developed how state government failings in one case were rehearsed in the next and more generally how these crises have been amplified by the decades long celebration of globalization theory and finally at how following the most recent crisis the future might unfold hence the ideas of deglobalization resilience and more speculatively the possibilities of democratization

Arms Races in International Politics Thomas G. Mahnken, Joseph Maiolo, David Stevenson, 2016 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists *Arms Races in International Politics* addresses two key questions

what causes arms races and what is the connection between arms races and the outbreak of wars *The Ideological Origins of Great Power Politics, 1789-1989* Mark L. Haas, 2018-09-05 How do leaders perceive threat levels in world politics and what effects do those perceptions have on policy choices Mark L Haas focuses on how ideology shapes perception He does not delineate the content of particular ideologies but rather the degree of difference among them Degree of ideological difference is he believes the crucial factor as leaders decide which nations threaten and which bolster their state's security and their own domestic power These threat perceptions will in turn impel leaders to make particular foreign policy choices Haas examines great power relations in five periods the 1790s in Europe the Concert of Europe 1815-1848 the 1930s in Europe Sino Soviet relations from 1949 to 1960 and the end of the Cold War In each case he finds a clear relationship between the degree of ideological differences that divided state leaders and those leaders' perceptions of threat level and so of appropriate foreign policy choices These relationships held in most cases regardless of the nature of the ideologies in question the offense-defense balance and changes in the international distribution of power **Radical Students** Alan Barcan, 2002 This is an insight into undergraduate life and thinking at Australia's oldest university where conflicting political ideas found expression on campus Included are articles and reports of meetings from student magazines and the press as well as anecdotes and lively undergraduate wit *Europe from War to War, 1914-1945* Alice-Catherine Carls, Stephen D. Carls, 2017-11-02 Europe from War to War 1914-1945 explores this age of metamorphosis within European history an age that played a crucial role in shaping the Europe of today Covering a wide range of topics such as religion arts and literature humanitarian relief during the wars transnational feminism and efforts to create a unified Europe it examines the social and cultural history of this period as well as political economic military and diplomatic perspectives Thematically organized within a chronological framework this book takes a fully comparative approach to the era allowing the reader to follow the evolution of key trends and ideas across these 30 turbulent years Each period is analyzed from both an international and a domestic perspective expanding the traditional narrative to include the role and impact of European colonies around the world while retaining a close focus on national affairs everyday existence within Europe itself and the impact of the wars on people's lives Chapters include discussion of regions such as Scandinavia the Balkans and Iberia that are less frequently covered emphasizing the network of connections between events and places across the continent Global in scope accessibly written and illustrated throughout with photographs and maps this is the perfect introductory textbook for all students of early twentieth century European history
