Space Assurance Or Space Domination The Case Against Weaponizing Space:

Space Assurance Or Space Dominance?: THE CASE AGAINST WEAPONIZING SPACE. Michael Krepon, 2022

Space Assurance Or Space Dominance? Michael Krepon, Christopher Clary, 2003 While space has long been utilized to assist military operations it has not been weaponized A new report by the Henry L Stimson Center *Space Assurance or Space Dominance The Case Against Weaponizing Space* argues that the surest way for the United States to lose the military advantages now enjoyed in space is to turn the heavens into a shooting gallery The Stimson report concludes that U S military and economic security is best served by avoiding the flight testing and deployment of space weaponry The pursuit of space dominance could impair global commerce produce long lasting environmental debris in space and harm alliance ties as well as relations between the United States and Russia and China the two countries whose help is most needed to stop and reverse proliferation The quest to dominate space could prompt low cost low tech countermeasures in the form of space mines and other anti satellite devices Potential adversaries in space would be faced with the dilemma of shooting first or risk being shot The quest to secure dominion over space would therefore elevate into the heavens the hair trigger postures that plagued U S and Soviet officials during the Cold War

The Politics of Space Security James Moltz, 2011-06-29 The past five decades have witnessed often fierce international rivalry in space but also surprising military restraint Now with an increasing number of countries capable of harming U S space assets experts and officials have renewed a long standing debate over the best route to space security Some argue that space defenses will be needed to protect critical military and civilian satellites Others argue that space should be a sanctuary from deployed weapons and military conflict particularly given the worsening threat posed by orbital space debris Moltz puts this debate into historical context by explaining the main trends in military space developments since Sputnik their underlying causes and the factors that are likely to influence their future course This new edition provides analysis of the Obama administration s space policy and the rise of new actors including China India and Iran His conclusion offers a unique perspective on the mutual risks militaries face in space and the need for all countries to commit to interdependent environmentally focused space security

Toward a Theory of Spacepower Charles D. Lutes, 2011-03-07 This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives The team was charged with considering the space domain in a broad and holistic way incorporating a wide range of perspectives from U S and international space actors engaged in scientific commercial intelligence and military enterprises This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend modify refine and integrate a broad range of viewpoints about human initiated space activity its relationship to our globalized society and its economic political and security interactions It will equip practitioners scholars students and citizens with the historical background and

conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment

The Politics of Space Security James Clay Moltz, 2008-06-24 At a time when no other country enjoys the advantages that the United States currently reaps from space some U S officials argue that U S space defenses will be needed to protect access to critical military and civilian assets in orbit Others argue that space should be a valuable sanctuary from deployed weapons and military conflict To inform this debate and develop meaningful guidelines for the future Clay Moltz has undertaken the only comprehensive study of the first 50 years of space security highlighting the main trends in military space developments their underlying causes and the factors that are likely to influence their future course What emerges is a picture of surprising military restraint shown by the United States and the Soviet Union in space and the inescapable conclusion that the only way forward is through a multilateral commitment to interdependent environmentally focused space security

Arms and Influence Jeffrey S. Lantis, 2016-07-27 Arms and Influence explores the complex relationship between technology policymaking and international norms Modern technological innovations such as the atomic bomb armed unmanned aerial vehicles UAVs and advanced reconnaissance satellites have fostered debates about the boundaries of international norms and legitimate standards of behavior These advances allow governments new opportunities for action around the world and have in turn prompted a broader effort to redefine international standards in areas such as self defense sovereignty and preemptive strikes In this book Jeffrey S Lantis develops a new theory of norm change and identifies its stages including redefinition involving domestic political deliberations and constructive norm substitution in multilateral institutions He deftly takes some of the most controversial new developments in military technologies and embeds them in international relations theory The case evidence he presents suggests that periods of change are underway across numerous different issue areas

High frontier win 05 , *Global Cooperation* Sai Felicia Krishna-Hensel, 2017-03-02 The twenty first century global community is confronted with unprecedented challenges as well as unique opportunities The degree to which it can establish and institutionalize norms and mechanisms designed to promote and sustain meaningful global cooperation will determine the future course of civilization This volume brings together a broad range of scholars to highlight some of the areas of contemporary transnational cooperation and to examine the scope and levels at which cooperation can and does take place The study examines the issue of weapons of mass destruction explores the promises of biotechnology and space technology and investigates the roles of global conventions and institutions as strategies for addressing the common threats facing the international system In short the volume raises important timely issues regarding the challenges and opportunities confronting the global community which both policy makers and academicians will find informative and thought provoking in their efforts to understand the nature and complexity of the twenty first century global community

Conflict and Cooperation in the Global Commons Scott Jasper, 2012-09-17 More than ever international security and economic prosperity depend upon safe access to the shared domains that make up

the global commons maritime air space and cyberspace Together these domains serve as essential conduits through which international commerce communication and governance prosper However the global commons are congested contested and competitive In the January 2012 defense strategic guidance the United States confirmed its commitment to continue to lead global efforts with capable allies and partners to assure access to and use of the global commons both by strengthening international norms of responsible behavior and by maintaining relevant and interoperable military capabilities In the face of persistent threats some hybrid in nature and their consequences Conflict and Cooperation in the Global Commons provides a forum where contributors identify ways to strengthen and maintain responsible use of the global commons The result is a comprehensive approach that will enhance align and unify commercial industry civil agency and military perspectives and actions

Securing Freedom in the Global Commons Scott Jasper, 2010-02-10 This will be the first book to attempt to take a holistic approach to security in the Commons outer space the atmosphere the oceans cyberspace etc in that it examines in detail each domain of the commons identifying and assessing the current and future threats to free international access to the domain
