Soviet Space Mythologies Slava Gerovitch, 2015-06-18 From the start the Soviet human space program had an identity crisis Were cosmonauts heroic pilots steering their craft through the dangers of space or were they mere passengers riding safely aboard fully automated machines Tensions between Soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in Soviet propaganda that wavered between praising daring heroes and flawless technologies Soviet Space Mythologies explores the history of the Soviet human space program within a political and cultural context giving particular attention to the two professional groups space engineers and cosmonauts who secretly built and publicly represented the program Drawing on recent scholarship on memory and identity formation this book shows how both the myths of Soviet official history and privately circulating counter myths have served as instruments of collective memory and professional identity These practices shaped the evolving cultural image of the space age in popular Soviet imagination Soviet Space Mythologies provides a valuable resource for scholars and students of space history history of technology and Soviet and post Soviet history **Reclaiming Space** James S. Eisenhower at the Dawn of the Space Age Mark Shanahan, 2016-11-14 Historians have established a norm whereby President Eisenhower's actions in relation to the dawn of the space age are judged solely as a response to the Soviet launch of the Sputnik satellite and are indicative of a passive negative presidency His low key actions are seen merely as a prelude to the US triumph in space which is largely bookended first by President Kennedy's man to the moon pledge in 1961 and finally by Neil Armstrong's moon landing eight years later This book presents an alternative view of the development of space policy during Eisenhower's administration assessing the hypothesis that his space policy was not a reaction to the heavily propagandized Soviet satellite launches or even the effect they caused in the US political and military elites but the continuation of a strategic journey This study engages with three distinct but converging strands of literature and proposes a revised interpretation of Eisenhower's actions in relation to rockets missiles and satellites namely that Eisenhower was operating on a parallel path to the established norm that started with the Bikini Atoll Castle H bomb tests developed through the CIA's reconnaissance efforts and was distilled in the Aeronautics and Space Act of 1958 which set a policy for US involvement in outer space that matched Eisenhower's desire for a balanced budget and fundamental belief in maintaining peace President Eisenhower was not interested in joining a space race while national security underpinned his thinking his space policy actions were strategic steps that actively sidestepped internecine armed forces rivalry and provided a logical next step for both civilian and military space programs at the completion of the International Geophysical Year In reassessing the United States first space policy the book adds to the revisionism under way in relation to the Eisenhower presidency focusing on the Helping Hands that enabled him to wage peace

Spaces of Spirituality Nadia Bartolini, Sara MacKian, Steve Pile, 2018-02-15 Spirituality is too often subsumed under the heading of religion and treated as much the same kind of thing Yet spirituality extends far beyond the spaces of religion The spiritual makes geography strange challenging the relationship between the known and the unknown between the real and the ideal and prompting exciting possibilities for charting the ineffable spaces of the divine which lie somehow beyond geography In setting itself that task this book pushes the boundaries of geographies of religion to bring into direct focus questions of spirituality By seeing religion through the lens of practice rather than as a set of beliefs geographies of religion can be interpreted much more widely bringing a whole range of other spiritual practices and spaces to light The book is split into three sections each contextualised with an editors introduction to explore the spaces of spiritual practice the spiritual production of space and spiritual transformations This book intends to open to up new questions and approaches through the theme of spirituality pushing the boundaries on current topics and introducing innovative new ideas including esoteric or radical spiritual

practices This landmark book not only captures a significant moment in geographies of spirituality but acts as a catalyst for future work
