The New Routledge Companion to Science Fiction Mark Boulton, Andrew M. Butler, Sherry Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese, and African diasporic science fiction. The contributors use both well-established critical and theoretical approaches and embrace a range of new ones, including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms, and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today. Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 license.

Space Tourism Value Chain Kang-Lin Peng, IokTeng Esther Kou, Hong Chen, 2024-03-22 This book benefits those interested in space tourism for doing business, conducting research, and teaching space services. The value chain analysis approach is applied to construct the knowledge system of the space industry from suppliers, consumers, agents, and related stakeholders. Space tourism has made a breakthrough in travel boundaries beyond Earth's line and impacted human living in many aspects, especially a vision of Mars immigration. The tourism industry has extended its reach to outer space. Space education has been popular in many countries because of human capital to serve in the new field. Researchers have developed unique methodologies to study space economic behaviors. The advancements in space technology and commercialization have formed a new market to drive a new era of space economics. Individuals can now venture beyond Earth's line and fulfill their desire for space exploration through space tourism. This form of tourism offers a unique opportunity for individuals to explore the origins and limitations of human beings. This book provides an overview of the current state of global space tourism development, including its characteristics, direct and indirect stakeholders, and existing challenges. The successful implementation of space tourism cases by private enterprises in Europe and the USA offers valuable insights into China's space tourism endeavors. Given China's leading position in global space technology, space tourism represents a promising commercial development field that can benefit the country and its citizens.
