Haskell, Michael J Rycroft, 2013-03-11 G Haskell Symposium Convenor Vice President for Academic Services and Outreach International Space University By taking Space of Service to Humanity as the theme for the inaugural event in its series of annual symposia the International Space University ISU is asserting that this application of space technology requires special attention at this time Future symposia will examine the issues of the day from different perspectives In keeping with the fundamental principles of ISU the symposium took a global perspective as distinct from national or regional perspectives and treated both technical and non technical topics Oral and poster presentations were delivered in the scientific engineering economic legal political and philosophical domains All oral papers were delivered in plenary session to encourage cross fertilization between specialities and posters were readily available for viewing throughout the three day event As an international and interdisciplinary forum for the sharing of experience and for discussion and debate the symposium proved to be a stimulating and worthwhile event for the 135 participants from 25 countries and 5 international organizations with backgrounds in industry government and academia

Beyond Identities: Human Becomings in Weirding Worlds Jim Dator, 2022-08-31 This book is an argument for moving beyond culturally historically ethnically biologically grounded identity as the necessary foundation of an authentic self It highlights examples of people who are attempting to inhabit identities they feel are more appropriate to themselves by deploring the damage done via claims about authentic identity The sole theme of this book is becoming beyond identity We are not fixed human beings but rather perpetually dynamic human becomings As intelligence is enabled or recognized beyond the merely human we should welcome our continuing evolution from homosapiens sapiens into many varieties of intelligences on Earth and the cosmos This book builds from tiny ripples into a tsunami of examples from conventional identity studies to Confucian human becomings to apotemnophilia to DIY biohacking to cyborgs to artefacts to hiveminds to intelligence in animals plants and fungi from the Holocene through the beginnings of the precarious climate change driven Anthropocene Epoch with hints far beyond and throughout the cosmos From a lifetime of work in future studies anticipation science and space studies the author balances frank tales of his own experiences and beliefs concerning his uncertain and fluid identities with those of others who tell their stories In addition to material from academic and popular sources a few poems further illuminate the scene NASA Activities ,1978 *American Disasters* Steven Biel, 2001-11 Ranging widely essayists here examine the 1900 storm that ravaged Galveston Texas the Great Chicago Fire of 1871 the Titanic sinking the Northridge earthquake the crash of Air Florida Flight 90 the 1977 Chicago El train crash and many other devastating events These catastrophes elicited vastly different responses and thus raise a number of important questions How for example did African Americans feminists and labor activists respond to the Titanic disaster Why did the El train crash take on such

symbolic meaning for the citizens of Chicago In what ways did the San Francisco earthquake reaffirm rather than challenge a predominant faith in progress **N A S A Activities** U.S. National Aeronautics and Space Administration,1977 **Bulletin**
