Space Stories That Really Happened S:

Stories of the Middle Space Deborah C. Bowen, 2010 Postmodernism's critics often accuse the movement of being dangerously amoral because of its apparent wariness of concepts such as truth, ethics, and justice. *Stories of the Middle Space* explores the possibility of postmodernism with a conscience and examines a variety of British and Canadian postmodern fiction to show how twentieth-century critical theory can be brought into fruitful dialogue with a faith-based perspective. Highlighting the wide variety of ethical concerns considered by writers such as Timothy Findley, Thomas King, Carol Shields, Julian Barnes, A.S. Byatt, and Salman Rushdie, Deborah Bowen makes the case for a new category of postmodern realism and shows how contemporary stories about the real and the good are constructed. Applying theoretical insights from Emmanuel Levinas and Mikhail Bakhtin, Bowen investigates categories of postmodern realism such as magic realism, parody, and metafiction while laying the groundwork for Christian readings of a medium that is often perceived as largely irreligious. An illuminating study of well-known contemporary writers, *Stories of the Middle Space* is a critically nuanced and methodologically innovative work that reads the postmodern from a faith-based perspective to create new literary insights. Deborah Bowen addresses the ethical concerns of a wide variety of postmodern fiction from a faith-based perspective that engages with the decentred discourses of post-structuralism. She suggests that a focus on the middle space between language and the world not only provides new insights into the construction of the real and the notion of a good story but also resituates the possibility of Christian reading in a largely post-Christian era.

BOOK JACKET Space, Structure, and Story Tamra Stambaugh, Emily Mofield, 2021-09-23 Winner of the 2017 NAGC Curriculum Studies Award. *Space, Structure, and Story* integrates Earth and space science with science fiction and nonfiction texts, poetry, and art. This unit developed by Vanderbilt University's Programs for Talented Youth is aligned to the Common Core State Standards and Next Generation Science Standards. Students explore advanced science and ELA content through the lens of structure: its parts, purpose, and function. Mobius strips, the hero's journey, dystopian fiction, black holes, Einstein's relativity, stars, and moons are just a few of the captivating in-depth topics explored through accelerated content, engaging activities, and differentiated tasks. Ideal for gifted classrooms or gifted pull-out groups, the unit features poetry from Carl Sandburg, Henry Wadsworth Longfellow, and C.S. Lewis; art from M.C. Escher, Vincent van Gogh, Claude Monet, and Salvador Dalí; a novel study featuring *A Wrinkle in Time* by Madeleine L. Engle; short stories from Isaac Asimov and Ray Bradbury; speeches from President John F. Kennedy and President Barack Obama; and informational texts about gravity, orbits, and black holes. Grades 4-6.

Space in Modern Egyptian Fiction Ramadan Yasmine Ramadan, 2019-11-01 In 1960s Egypt a group of writers exploded onto the literary scene transforming the aesthetic landscape Space in Modern Egyptian Fiction explores how this literary generation presents a marked shift in the representation of rural urban and exilic space reflecting a disappointment with the project of the postcolonial nation state in Egypt Combining a sociological approach to literature with detailed close readings Yasmine Ramadan explores the spatial representations that embodied this shift within the Egyptian literary scene and the disappearance of an idealized nation in the Egyptian novel This study provides a robust examination of the emergence and establishment of some of the most significant writers in modern Egyptian literature and their influence across six decades while also tracing the social economic political and aesthetic changes that marked this period in Egypt's contemporary history

Strong Opinions Chris Danta, Sue Kossew, Julian Murphet, 2011-07-14 This new collection of essays on Coetzee examines how his novels create and unsettle literary authority Its unique contribution is to show how

Coetzee provokes us into reconsidering certain basic formal and existential questions such as the nature of literary realism the authority of the author and the constitution of the human self in a posthumanist setting by consciously revealing the literary theoretical seams of his work *Strong Opinions* makes the innovative claim that Coetzee's work is driven not by a sense of scepticism or nihilism but rather by a form of controlled exposure that defines the literary The essays in the volume variously draw attention to three of Coetzee's most recent and significant experiments in controlled exposure The first is the exposure of place Coetzee's decision to set his novels in his newly adopted country of Australia The second is the exposure of form Coetzee's direct almost essayistic address of literary philosophical topics within his novels And the third is the exposure of limits Coetzee's explicit deconstruction of the traditional limits of human life

Science, Time and Space in the Late Nineteenth-Century Periodical Press James Mussell, 2017-05-15 James Mussell reads nineteenth century scientific debates in light of recent theoretical discussions of scientific writing to propose a new methodology for understanding the periodical press in terms of its movements in time and space That there is no disjunction between text and object is already recognized in science studies Mussell argues however this principle should also be extended to our understanding of print culture within its cultural context He provides historical accounts of scientific controversy documents references to time and space in the periodical press and follows magazines and journals as they circulate through society to shed new light on the dissemination and distribution of periodicals authorship and textual authority and the role of mediation in material culture Well known writers like H G Wells and Arthur Conan Doyle are discovered in new contexts while other authors publishers editors and scientists are discussed for the first time Mussell is persuasive in showing how his methodology increases our understanding of the process of transformation and translation that underpins the production of print and informs current debates about the status of digital publication and the preservation of archival material in electronic forms Adding to the book's usefulness are an extended bibliography and a discussion of recent debates regarding digital publication

A Simple Story of a Not-So-Simple Universe Jerry Miller, 2009-02-01 Describes the story of the universe from the beginning of space and time to the creation of the Earth and human life

1999: A Space Odyssey John K Balor, 2018-08-03 Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series *Space 1999* can be understood in relation to Stanley Kubrick's 2001 *A Space Odyssey* by looking at both narratives through the perspective of systems theory As a result of doing so an engaged debate concerned with the political and philosophical subtext of both stories developed This book gives a full account of the debate with summaries of ideas and insights The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com
