NASA EP. United States. National Aeronautics and Space Administration, 1968 Spacecraft Tracking William R. Corliss, 1969 **Spying from Space** David Christopher Arnold, 2008-06-12 On August 14 1960 a revolution quietly occurred in the reconnaissance capabilities of America When the Air Force C 119 Flying Boxcar Pelican 9 caught a bucket returning from space with film from a satellite the American intelligence community gained access to previously denied information about the Soviet Union The Corona reconnaissance satellite missions that followed lifted the veil of secrecy from the communist bloc revealing among other things that no Missile Gap existed This revolution in military intelligence could not have occurred without the development of the command and control systems that made the Space Race possible In **Spying from Space** David Christopher Arnold tells the story of how military officers and civilian contractors built the Air Force Satellite Control Facility AFSCF to support the National Reconnaissance Program The AFSCF also had a unique relationship with the National Reconnaissance Office a secret organization that the U S government officially concealed as late as the 1990s Like every large technology system the AFSCF evolved as a result of the interaction of human beings with technology and with each other **Spying from Space** fills a gap in space history by telling the story of the command and control systems that made rockets and satellites useful Those interested in space flight or intelligence efforts will benefit from this revealing look into a little known aspect of American achievement Those fascinated by how large complex organizations work will also find this an intriguing study of inter service rivalries and clashes between military and civilian cultures **COSPAR Unveiled: Decoding Spacecraft IDs and Tracking the Cosmos** Zahid Ameer, 2025-02-23 **COSPAR Unveiled** Decoding Spacecraft IDs and Tracking the Cosmos offers an in depth exploration into the fascinating world of COSPAR designations the unique identification system used to track spacecraft across the cosmos This comprehensive guide uncovers the intricacies of how COSPAR IDs are assigned to satellites space probes and other space faring objects enabling global tracking of space missions Whether you re a space enthusiast astronomer or science fiction lover this book delves into the history structure and significance of COSPAR codes and their essential role in space exploration Discover how this system facilitates space mission cataloging deep space tracking and understanding orbital movements Perfect for space exploration enthusiasts spacecraft ID hobbyists and those intrigued by the workings of satellite tracking this book illuminates the lesser known yet critical aspects of space navigation Join the journey to decode the cosmos and unlock the secrets behind the tracking systems that connect us to the final frontier America's Leap Into Space Henry L. Richter, 2015-08-27 After the shock of watching Russia s Sputnik become the world s first artificial satellite America s infant space program hurried to launch one of their own In just 90 days Dr Henry Richter and his colleagues at the Jet Propulsion Laboratory developed and launched the nation s response Through innovation teamwork and tenacity these pioneering scientists and engineers began America s exploration of space that continues to determine our place in the cosmos JPL and the First Explorer Satellites

tracks the development of the Russian Germany and American rocketry programs through the World Wars and into the arms race of the Cold War Dr Richter s memories and extensive research shed a light into the earliest days of the space age It is a fascinating story that is equal parts memoir and insider history of one of the world s most dynamic and revolutionary periods

NASA EP. United States. National Aeronautics and Space Administration, **NASA Thesaurus** ,1967 **Aerospace Bibliography** ,1972 The History of Human Space Flight Ted Spitzmiller,2017-02-21 Military Writers Society of America Awards Gold Medal for History Highlighting men and women across the globe who have dedicated themselves to pushing the limits of space exploration this book surveys the programs technological advancements medical equipment and automated systems that have made space travel possible Beginning with the invention of balloons that lifted early explorers into the stratosphere Ted Spitzmiller describes how humans first came to employ lifting gasses such as hydrogen and helium He traces the influence of science fiction writers on the development of rocket science looks at the role of rocket societies in the early twentieth century and discusses the use of rockets in World War II warfare Spitzmiller considers the engineering and space medicine advances that finally enabled humans to fly beyond the earth s atmosphere during the space race between the United States and the Soviet Union He recreates the excitement felt around the world as Yuri Gagarin and John Glenn completed their first orbital flights He recounts triumphs and tragedies such as Neil Armstrong s one small step and the Challenger and Columbia disasters The story continues with the development of the International Space Station NASA s interest in asteroids and Mars and the emergence of China as a major player in the space arena Spitzmiller shows the impact of space flight on human history and speculates on the future of exploration beyond our current understandings of physics and the known boundaries of time and space *After the War* Ruth H. Howes,Caroline L. Herzenberg,2015-12-01 This book examines the lives and contributions of American women physicists who were active in the years following World War II during the middle decades of the 20th century It covers the strategies they used to survive and thrive in a time where their gender was against them The percentage of PhD s in physics has risen from 6% in 1983 to 20% in 2012 an all time high for women By understanding the history of women in physics these gains can continue It discusses two major classes of women physicists those who worked on military projects and those who worked in industrial laboratories and at universities largely in the late 1940s and 1950s While it includes minimal discussion of physics and physicists in the 1960s and later this book focuses on the challenges and successes of women physicists in the years immediately following World War II and before the eras of affirmative actions and the use of the personal computer
