Ritual bones or common waste J. Thilderkvist, 2013-11-01 This book addresses the problems of identifying human actions behind finds of bones in settlement archaeology exemplified with the identification of ritual deposits In order to formulate a methodological framework for approaching the identification of ritual deposits different methods are tested on four Early Medieval case studysites Dongjum and Leeuwarden two artificial dwelling mounds situated in the then undiked salt marches of the Northern Netherlands Midlaren an inland settlement in Drenthe also in the Northern Netherlands and finally Upp kra a central place in the South of Sweden The bone fragments from the four materials are studied in a five step process of definition description identification interpretation and explanation The deposits are discussed with the help of various archaeological ethnographic and historical sources The results of the analysis lead to a methodological framework for understanding individual deposits based on a holistic perspective where all information is regarded as potentially valuable various methods are taken into consideration and simplification is avoided

Bones and Identity Nimrod Marom, Reuven Yeshuran, Lior Weissbrod, Guy Bar-Oz, 2016-07-31 Seventeen papers demonstrate how zooarchaeologists engage with questions of identity through culinary references livestock husbandry practices and land use Contributions combine hitherto unpublished zooarchaeological data from regions straddling a wide geographic expanse between Greece in the West and India in the East and spanning a time range from the latest part of the Palaeolithic to the Middle Ages The vitality of a hands on approach to data presentation and interpretation carried out primarily at the level of the individual site the arena of

research providing the bread and butter of zooarchaeological work conducted in southwest Asia is demonstrated Among the themes explored are shifting identities of late hunter gatherers through interactions with settled agrarian societies the management of camp sites by early complex hunter gatherers processes of assimilation of Roman culinary practices among Egyptian elites and the propagation of medieval pilgrim identity through the use of seashell insignia A wealth of new data is discussed and a wide variety of applications of analytical approaches are applied to particular case studies within the framework of social and contextual zooarchaeology The volume constitutes the proceedings of the 11th meeting of the ICAZ Working Group Archaeozoology of Southwestern Asia and Adjacent Areas ASWA **Transforming Townscapes** Neil Christie, 2017-12-02 This monograph details the results of a major archaeological project based on and around the historic town of Wallingford in south Oxfordshire Founded in the late Saxon period as a key defensive and administrative focus next to the Thames the settlement also contained a substantial royal castle established shortly after the Norman Conquest The volume traces the pre town archaeology of Wallingford and then analyses the town's physical and social evolution assessing defences churches housing markets material culture coinage communications and hinterland Core questions running through the volume relate to the roles of the River Thames and of royal power in shaping Wallingford's fortunes and identity and in explaining the town's severe and early decline **A Biography of Power: Research and Excavations at the Iron Age 'oppidum' of Bagendon, Gloucestershire (1979-2017)** Tom Moore, 2020-07-30 This book explores the changing nature of power and identity from the Iron Age to the Roman period in Britain It provides fresh insights into the origins and nature of one of the lesser known but perhaps most significant Late Iron Age oppida in Britain Bagendon in Gloucestershire
