2011 + página web Jesús Ma Prieto Valtueña, 2009 Decimosptima edición de este manual de Exploración clínica práctica en el que se aportan conocimientos y datos prácticos que facilitan una interpretación correcta de los sistemas y signos patológicos de cada paciente. En esta nueva edición en la que se mantiene la estructura de la obra se han revisado y actualizado todos los capítulos ampliándose ligeramente la extensión de la misma. En la exploración clínica se deben considerar tres clases de sistemas objetivos o signos. En primer lugar los físicos estertores, taquipnea, tumoraciones y perceptibles con una buena exploración. En segundo lugar los sistemas complementarios que reclaman el auxilio de aparatos de laboratorio y de investigaciones especiales. Los terceros son subjetivos, los sistemas propiamente dichos que vienen proporcionados por el enfermo durante el interrogatorio. Una parte de la iconografía ha sido renovada y se ha incrementado ligeramente el número de tablas y cuadros y se han puesto al día los conceptos y se han añadido técnicas más recientes para que el profesional tenga una más amplia referencia a la hora de considerar los sistemas citados. Como novedad la obra incluye material complementario en Web formato ppt con vídeos de exploración neurológica. Su estructura recogiendo y ordenando los sistemas y explicando causas, orígenes y condiciones de su formación lo convierte en una herramienta útil para facilitar la consulta de las obras capitales de la exploración. Este libro de exposición clara y didáctica está dirigido tanto al profesional para quien constituye un vademécum manual que le permite resolver las inevitables dudas que se presentan durante el intenso ejercicio de la profesión, como para el alumno para quien constituye un auxiliar indispensable a tener a mano dado los sistemas claros y evidentes no siempre se presentan en la clínica.
