A Spider's World Friedrich G. Barth, 2013-03-09 Spiders are wonderful creatures Their varied and complex range of behavior and highly developed sensory systems are excellently adapted to the environmental conditions as is proven by their evolutionary success Over 400 million years spiders have developed their sensory organs to a fascinating technical perfection and complexity In his intriguing book Professor Friedrich G Barth puts this technical perfection into the context of biology in which the interaction between environment and sensory organs and the selectivity of the senses as a link between environment and behavior play a major role Spider Ecophysiology Wolfgang Nentwig, 2013-02-15 With over 43 000 species spiders are the largest predacious arthropod group They have developed key characteristics such as multi purpose silk types venoms consisting of hundreds of components locomotion driven by muscles and hydraulic pressure a highly evolved key lock mechanism between the complex genital structures and many more unique features After 300 million years of evolutionary refinement spiders are present in all land habitats and represent one of the most successful groups of terrestrial organisms Ecophysiology combines functional and evolutionary aspects of morphology physiology biochemistry and molecular biology with ecology Cutting edge science in spiders focuses on the circulatory and respiratory system locomotion and dispersal abilities the immune system endosymbionts and pathogens chemical communication gland secretions venom components silk structure structure and perception of colours as well as nutritional requirements Spiders are valuable indicator species in agroecosystems and for conservation biology Modern transfer and application technologies research spiders and their products with respect to their value for biomimetics material sciences and the agrochemical and pharmaceutical industries **Robotics Research** John M. Spidermen: Nigerian Chindits and Wingate's

Operation Thursday Burma 1943 - 1944 John Igbino,2018-10-06 In 1944 twenty thousand Allied Airborne Special Force troops in five Brigades commanded by Major General Orde Wingate landed behind the Japanese lines in Northern Burma The Operation was Codenamed Operation Thursday The Special Force troops were nicknamed Chindits Four thousand Nigerian troops fought in the Special Force Brigades as Chindits during Operation Thursday This book is an account of their operations behind Japanese lines between February and August 1944 The Brigade s Insignia was the Black African Spider advancing on its prey Thus the Brigade called itself the Spider Brigade its Battalions namely the 6th 7th and 12th Nigeria Regiments Spider Regiments and its troops Spidermen The book is a well written account of the Spider Brigade s battles against the 18th Division of the Imperial Japanese Army It should force Chindit Historians to confront the anomalies in Contemporary History s treatment of Nigerian Chindits The book is a scholarly and dispassionate excursion into the 14th Army s Campaigns putting under the microscope the preconceived assumptions of British and Indian Armies Officer Corps about the fighting quality of Nigerian Chindits Thus the book is an important and long overdue account of Operation

Thursday that will become the standard work on Nigeria's contributions to Allied Airborne Invasion of Burma
