## **Spielstrukturen In Shakespeares Komodien:**

*Wolfgang Iser* Ben De Bruyn, 2012-05-29 Although Wolfgang Iser is one of the most influential literary theorists of the twentieth century there is no authoritative study about his oeuvre The present work remedies that problem by analysing Iser's German and English writings in detail Apart from being the first comprehensive account of his work this study also modifies the established view of Iser's theory In contrast to the idea that his only contribution to literary studies is the reception theory of the 1970s this account demonstrates the importance of Iser's work on history and anthropology from the 1950s and 1990s Instead of exclusively focusing on familiar terms such as indeterminacy this analysis also discusses Iser's view of modernity fiction and culture As this discussion shows his writings develop a consistent theory of the novel and the way in which it allows its readers to articulate new views of reality To situate this theory Iser's institutional and intellectual background is described as well paying special attention to the Poetik und Hermeneutik circle and thinkers like Blumenberg and Kermode The continued relevance of his theory is demonstrated via comparisons with recent research on the novel and memory as well as examples from contemporary novelists like Juli Zeh and Hilary Mantel

**Shakespeare / Space** Isabel Karremann, 2024-02-22 Shakespeare Space explores new approaches to the enactment of space in and through Shakespeare's plays as well as to the material cognitive and virtual spaces in which they are enacted With contributions from 14 leading and emergent experts in their fields the collection forges innovative connections between spatial studies and cultural geography cognitive studies memory studies phenomenology and the history of the emotions gender and race studies rhetoric and language translation studies theatre history and performance studies Each chapter offers methodological reflections on intersections such as space mobility space emotion space supernatural space language space race and space digital whose critical purchase is demonstrated in close readings of plays like King Lear The Comedy of Errors Othello and Shakespeare's history plays They testify to the importance of space for our understanding of Shakespeare's creative and theatrical practice and at the same time enlarge our understanding of space as a critical concept in the humanities It will prove useful to students scholars teachers and theatre practitioners of Shakespeare and early modern studies

*Maskeraden* Elfi Bettinger, Julika Funk, 1995 Immersion and Distance. Werner Wolf, Walter Bernhart, Andreas Mahler, 2013 Readers who appear to be lost in a storyworld members of theatre or cinema audiences who are moved to tears while watching a performance beholders of paintings who are absorbed by the representations in front of them players of computer games entranced by the fictional worlds in which they interactively participate all of these mental states of imaginative immersion are variants of aesthetic illusion as long as the recipients although thus immersed are still residually aware that they are experiencing not real life but life like representations created by artefacts Aesthetic illusion is one of the most forceful effects of reception processes in representational media and thus constitutes a powerful allurement to expose ourselves again and again to e.g. printed stories pictures and films be they factual or fictional In contrast to traditional

discussions of this phenomenon which tend to focus on one medium or genre from one discipline only the present volume explores aesthetic illusion as well as its reverse side the breaking of illusion from a highly innovative multidisciplinary and transmedial perspective The essays assembled stem from disciplines that range from literary theory to art history and include contributions on drama lyric poetry the visual arts photography architecture instrumental music and computer games as well as reflections on the cognitive foundations of aesthetic illusion from an evolutionary perspective The contributions to individual media and aspects of aesthetic illusion are prefaced by a detailed theoretical introduction Owing to its transmedial and multidisciplinary scope the volume will be relevant to students and scholars from a wide variety of fields cultural history at large intermediality and media studies as well as more particularly literary studies music film and art history **Richard Wagners Shakespeare Wagner in der Diskussion, Bd. 3 €24,80 / Sfr 44,10** Yvonne Nilges, 2007 **Barocktheater als Spielraum** Wolfram Nitsch, 2000 **Differente Lachkulturen?** Thorsten Unger, Brigitte Schultze, Horst Turk, 1995
