

The book cover features a stylized illustration of a European street scene at night. A dark figure, presumably a spy, is running across a cobblestone street in the foreground. The street is flanked by multi-story buildings with balconies and windows. A bright yellow light source, possibly a fire or a street lamp, illuminates the scene from the middle ground. The overall color palette is dark with muted greens, browns, and a touch of yellow.

State Department and the intelligence branches of the Army Navy and Air Force The intelligence community had never been one happy family The average intelligence expert was an individual of strong conviction high talent and temperament and believed that his agency could complete an assignment better than a competing agency and never mind a lot of folderol about rules and regulations Some imprudent things were done and more imprudent things were said but the gigantic spying machine did work Although information was often duplicated and toes trod together intelligence agencies provided information that influenced presidents cemented decisions and molded history The question the tax paying American public had a right to ask was whether intelligence gathering agencies might not work just as well if cut down to a more manageable and less duplicative size In *The Super Spies* Andrew Tully shrewdly examined the balance sheets and in conclusion urged the Congress to do the same Although the names and dates have changed Tully's disclosures are as applicable today as they were 60 years ago Fascinating and readable *The Super Spies* was and is a ground breaking book *Revolutions in Mexico* United States.
