Spinal Cord Injuries Alan G. Hardy, Alain B. Rossier, 1975

Spinal Cord Injury Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Spinal Cord Injury, 2005-08-27

An estimated 11 000 spinal cord injuries occur each year in the United States and more than 200 000 Americans suffer from maladies associated with spinal cord injury This includes paralysis bowel and bladder dysfunction sexual dysfunction respiratory impairment temperature regulation problems and chronic pain During the last two decades longstanding beliefs about the inability of the adult central nervous system to heal itself have been eroded by the flood of new information from research in the neurosciences and related fields However there are still no cures and the challenge of restoring function in the wake of spinal cord injuries remains extremely complex

Spinal Cord Injury examines the future directions for research with the goal to accelerate the development of cures for spinal cord injuries While many of the recommendations are framed within the context of the specific needs articulated by the New York Spinal Cord Injury Research Board the Institute of Medicine's panel of experts looked very broadly at research priorities relating to future directions for the field in general and make recommendations to strengthen and coordinate the existing infrastructure

Wheeling and Dealing Esther I. Wilder, 2006

Before his motorcycle accident Travis saw himself becoming a pro football player Now paralyzed from the nipple down he says At times it's a pain in the ass literally and figuratively But it allows me to not be as threatening to some people the way I was when I was still an athlete Because a lot of times male interaction is done on the basis of pissing contests I'm bigger I'm tougher I'm stronger I'm smarter When you're in a chair they don't look at you like that At the same time Travis complains that many people are uncomfortable interacting with him because of his disability I would rather you make a mistake and deal with me than not deal with me at all

Meghan is a high level quadriplegic living alone who uses a power wheelchair and requires daily attendant care She laments There are so many people who think we're asexual we're not pretty and we're creeps and weirdoes To dispel this myth she envisions a fashion show of women in wheelchairs parading down a runway

Meghan has been involved in a number of sexual relationships since sustaining her injury While she doesn't

think her disability has diminished her sexual pleasure she feels that it has affected her sexual performance Well you can't move it You can't like bump and grind In 32 unusually frank in depth interviews like these the men and women in this book freely discuss their sex lives their beliefs about God how they want others to treat them and whether they want to walk again In each chapter the author presents their complex voices and comprehensive research about different facets of spinal cord injury SCI Wheeling and Dealing explores the extent to which people with spinal cord injury locate their challenges in their physical impairments or in the social environment Some disagree with those disability activists who focus almost exclusively on the latter but the author examines this issue in depth Topics include Physical health from degrees of loss of function to problems like pressure sores temperature regulation and bladder control The stages of psychological adjustment and rehabilitation Obstacles to sexual intimacy treatment of erectile dysfunction and new sources of sexual pleasure and emotional intimacy Religion and spirituality Social and political beliefs with those with SCI weighing in on everything from welfare services to embryonic stem cell research Dating marriage and parenting Friendship networks and social supports concerns about transportation and accessibility stigma Education employment and economic consequences This book is the recipient of the 2004 Norman L and Roselea J Goldberg Prize from Vanderbilt University Press for the best project in the area of medicine
