Catalogue of the Horner Collection of Spinning Wheels and Accessories (Classic Reprint) ,2018-02-03 Excerpt from Catalogue of the Horner Collection of Spinning Wheels and Accessories The original Spindle consisted of two parts the Spindle and the whorl this latter was a piece of wood stone clay or other material which gave momentum to the Spindle when twirled between the fingers or between the palm of the hand and the leg as universally practised in Southern Italy The distaff upon which the material to be Spun was wound was carried under the left arm or placed in the belt or breast of the operator the spindle was notched at the top to receive the end of the material so long as the Spindle revolved the yarn twisted and when it ceased the yarn was wound on the Spindle the last twisted portion placed in the notch and the Operation continued It would appear natural that the revolving motion given to the Spindle by means of the operator's fingers could be arrived at by a mechanical method if the spindle were mounted in bearings and revolved by means of a band over a driving wheel The idea occurred to someone and thus the first Spinning wheel was made It was a Simple evolution on the Spindle was fastened a small pulley called in these countries a whirl derived from the whorl of the ancient spindle motion was conveyed to the Spindle by a band running over the wheel and the whirl as in modern Spinning to day in the latter this whirl is called a wharve evidently derived from the older word The Spindle bearings were fastened in a framework of wood which also supported the bearings in which the wheel revolved by means of the Operator's hand We here find the Spindle of the ancients placed horizontally and revolved from the motion of the wheel instead of being twirled between the fingers When about a yard in length was Spun it was allowed to wind itself upon the Spindle and the Operation was repeated in a manner similar to that employed in the older operation It is not known definitely whence the spinning wheel originated it is generally and with some reason supposed that India was its birthplace such wheels have been known there for centuries past no About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
