Spirit Of Enterprise The 1990 Rolex Awards:

Spirit of Enterprise David W. Reed,1990 **Spirit of Enterprise** David W. Reed,1990 *The History of the Rolex Awards for Enterprise* ,1996 **Spirit of Enterprise** ,1996 It presents five Laureates and ten Associate Laureates chosen for their innovative ideas and other interesting projects submitted to the 1996 Rolex Awards for Enterprise The Bulletin ,1991 **The Best of the Rolex Awards for Enterprise** ,1996 All laureates of the Rolex Awards for Enterprise are portrayed to show their commitments to do something that will make a difference in the world *Made for Each Other* Ronald M. Lanner,1996-08-29 Some trees and birds are made for each other Take for example the whitebark pine a timberline tree that graces the moraines and ridgetops of the northern Rockies and the Sierra Nevada Cascades system This lovely five needled pine long lived and rugged though it is cannot reproduce without the help of Clark s nutcracker And the nutcracker though it captures insects in the summer and steals a bit of carrion cannot raise its young in these alpine habitats without feeding them the nutritious seeds of the whitebark pine Between them these dwellers of the high mountains provide for each others posterity which leads biologists to label their relationship symbiotic or mutualistic But there is more to it than that because in playing out their roles these partners change the landscape The environment they create provides life s necessities to many other plants and animals Working in concert Clark s nutcracker and the whitebark pine build ecosystems In *Made for Each Other A Symbiosis of Birds and Pines* Ronald M Lanner details for the first time this fascinating relationship between pine trees and Corvids nutcrackers and jays showing how mutualism can drive not only each others evolution but affect the ecology of many other members of the surrounding ecosystem as well Lanner explains that many of the world s pines have seeds not adapted to wind dispersal Fortunately their seeds are harvested from the cone and scattered over many miles by seed eating jays and nutcrackers who bury millions of seeds in the soil as a winter food source Remarkably these pine nut dependent birds can find their caches even through deep snow Seeds left in the soil germinate perpetuating the pines and guarantee future seeds for future birds Moreover the newly planted whitebark pine groves encourage further tree growth such as Engelmann spruce and eventually the patches of open grown woodland coalesce forming a continuous forest Large forest stands offer cover for large animals like bear elk and moose and provide territories for Red Squirrels These squirrels also depend on pine seeds as a food source storing large quantities of seeds on the ground piled up against fallen logs or stumps or buried in the forest litter In the fall both black and grizzly bears are preparing to hibernate and must increase their stores of body fat The seeds of whitebark pine are large and very rich containing sixty to seventy percent fat and are an ideal food for this purpose The large seed reserves created by the squirrels become a feasting ground for these bears Meanwhile the sun loving trees shaded out by the maturing decay offer housing for cavity nesters like woodpeckers and nuthatches as well as a breeding ground for fungi which are eagerly devoured by mule deer and red squirrels in search of protein Eventually when the forest is ignited in one of the thunderstorms so common and so violent in the high country an

Prabhakaran Nair,2016-04-28 The Nutrient Buffer Power Concept a revolutionary soil testing procedure developed and tested for over more than three decades in European African and Asian soils looks at soil testing to devise appropriate and accurate fertilizer recommendations for many field crops such as summer rye wheat and maize among cereals red gram among pulses white clover among fodder crops and black pepper and cardamom among perennial crops with a totally new perspective as compared to routine and text book methods of soil testing The center piece of the concept is the accurate quantification of a soil nutrient s buffer power which is then integrated into routine soil test data to devise appropriate and accurate fertilizer recommendations *Thermodynamics of Soil Nutrient Bioavailability* Kodoth Prabhakaran Nair,2021-08-19 This book focusses on the thermodynamics of soil nutrient bioavailability and in particular the most

important plant nutrients such as phosphorus and potassium among major nutrients and zinc among micronutrients It proposes a paradigm shift in the approach to global soil testing procedures Historically soil testing has been used to quantify availability of essential plant nutrients to field grown crops However contemporary soil tests are based on philosophies and procedures developed several decades ago without significant changes in their general approach For a soil test to be accurate one needs to clearly understand the physico chemico physiological processes at the soil root interface and an understanding of soils and plant root systems as polycationic systems is essential It is this knowledge that leads to sound prescriptive soil nutrient management inasmuch as soil nutrient bioavailability vis vis fertilizer application is concerned because of all the factors which govern sustainability in crop production the nutrient factor is the most important yet it is also least resilient to management This book provides a clear scientific basis of the thermodynamics of soil nutrient bioavailability which routine soil testing does not provide *BBC Wildlife* ,1988 *Complex Symmetries* György
