## **Spiritual Research Methods And Results:**

**Results of Spiritual Research** Rudolf Steiner, 2022-04-26 In a previously unavailable series of talks to the general public Rudolf Steiner builds systematically lecture by lecture on the fundamentals of spiritual science from the nature of spiritual knowledge and its relationship to conventional science the path of personal development and the task of metaphysical research to specific questions on the mystery of death the meaning of fairy tales the significance of morality and the roles of individual figures in human evolution such as Leonardo da Vinci Raphael and Jacob Boehme At the time of these presentations Steiner had already worked in Berlin for many years and thus could reckon with a regularly returning audience to whom what mattered was to enter ever more deeply into the areas of knowledge that were newly opening up to them Marie Steiner As a consequence and through a series of inter connecting lectures whose themes are entwined with one another he was able to communicate a coherent and challenging spiritual perception of reality based on his personal research Presented here with notes an index and an introduction by Simon Blaxland de Lange the 14 lectures include How is Spiritual Science Refuted On What Foundation is Spiritual Science Based The Tasks of Spiritual Research for both Present and Future Errors of Spiritual Research Results of Spiritual Research for Vital Questions and the Riddle of Death The World Conception of a Cultural Researcher of the Present Herman Grimm and The Legacy of the Nineteenth Century *Creative Spiritual Research* Coenraad van Houten, 2011 How do adults learn and develop How can adult learning become a living growing process Cover **Knowledge of Spirit Worlds and Life After Death** Dr Bob Woodward, 2020-09-24 Everyone with a curiosity for spiritual knowledge should read this excellent book Peter John psychic artist Based on direct communications with his eight spirit guides Dr Bob Woodward confirms that we have all lived in spirit worlds before our birth and that we will enter these same realms again after our material deaths In a very real sense these higher spirit worlds are actually our true home he says rather than our present physical existence which is only a temporary abode In consultation with his spirit guides including a Tibetan Lama a Jewish Rabbi a Native American and his personal guardian angel Bob Woodward gives a detailed survey of our lives in spirit worlds before birth and after death our relationships there with friends family and even pets and our connections with both good and evil spiritual beings He also gives a commentary on a range of subjects such as reincarnation and climate change In a final extensive and moving interview Woodward finds and speaks with the soul of his deceased father who offers enlightening glimpses of life after death Whilst the author's knowledge is grounded in decades of study of the work of Rudolf Steiner with which he compares the results of his own extrasensory perceptions Knowledge of Spirit Worlds is not intended as a dry philosophical study Rather it has a warm experiential quality based as it is on personal interaction with spirit entities and emphasizes the love that connects all worlds and beings together *Spirituality in College Students' Lives* Alyssa Bryant Rockenbach, Matthew J. Understanding New Perspectives of Spirituality Edie Lanphar, Agata Wilczek, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This book deals with the rapidly developing field of spirituality Although having a singularity of focus the chapters have been written by a cross cultural and international set of researchers who discuss critical issues from an interdisciplinary perspective Thus while a broad range of critical aspects emerge the chapters are threaded together by the concept of spirituality as a lone walk While alone the spiritual journey is also deeply connected to others As a deeply human experience the chapters in this book therefore reflect the prismatic viewpoints that form the understandings and experiences of the spiritual walk This book challenges the reader to start to understand the apparent ambiguity this appears to bring to researchers and practitioners Rather than a roadblock to understanding the multiple frames and facets this brings it is instead a rich field for the exploration of the human condition

researchers and students of Religion Spirituality and Research Methods      Toward a Spiritual Research Paradigm Jing Lin, Rebecca L. Oxford, Tom E. Culham, 2016-07-01 Spirituality and spiritual experiences have been the bedrock of every civilization and together form one of the highest mechanisms for making sense of the world for billions of people Current research paradigms due to their limitation to empirical sensory psychologically or culturally constructed realities fail to provide a framework for exploring this essential area of human experience The development of a spiritual research paradigm will provide researchers from the social sciences and education the tools and abilities to systematically explore fundamental questions regarding human spiritual experiences and spiritual growth A spiritual research paradigm requires an ontology that considers all reality to be multidimensional interconnected and interdependent It requires an epistemology that integrates knowing from outer sources as well as inner contemplation acknowledging our integration of soul and spirit with the body and mind Three additional aspects are useful to a spiritual research paradigm axiology methodology and teleology An axiology concerns what is valued good and ethical A methodology is the appropriate approach to systematic inquiry A fifth and less frequently mentioned aspect is teleology an explanation of the goal or end telos to which new knowledge is applied such as gaining wisdom and truth touching the divine increasing inner peace exploring hidden dimensions or improving society This book takes the first step to develop such a research paradigm We draw from world spiritual traditions as well as scholarship that has arisen from contemplative practices We also attempt to build a bridge between science and spirituality Spiritual research is not necessarily opposed to scientific research in fact each can shed light on the other      *Spiritual Research* Rudolf Steiner, 1981 Edited by Paul M Allen this is a marvellous collection of lectures dealing with spiritual research Subjects include the human aura psychological questions the science of the spirit and the birth of light

Measures of Spirituality/Religiosity (2018) Arndt Büssing, 2019-04-30 The interest in the topic of spirituality as a more or less independent dimension of quality of life is continuously growing and research questions are beginning to change as the field of religiosity changes becoming more diverse and pluralistic Addressing new topics in health research also relies on standardized questionnaires The number of instruments intended to measure specific aspects of spirituality is growing and it is particularly difficult to evaluate the new instruments This Special Issue will focus on some of the established instruments updating them to different languages and cultures but will also describe the features and intentions of newly developed instruments which may potentially be used in larger studies to develop knowledge relevant to spiritual care and practice This Special Issue will serve as a resource on the instruments used to study the wide range of organized religiosity the individual experience of the divine and an open approach in the search for meaning and purpose in life      The SAGE Encyclopedia of Communication Research Methods Mike Allen, 2017-04-11 Communication research is evolving and changing in a world of online journals open access and new ways of obtaining data and conducting experiments via the Internet Although there are generic encyclopedias describing basic social science research methodologies in general until now there has been no

*The Three Levels of Sustainability* Elena Cavagnaro, George H. Curiel, 2017-09-08 This book aims to provide the missing link in current debates around sustainability The role of business governments NGOS and multilateral institutions are widely covered and many books discuss their possible actions strategies and roles But all of these organizations are made up of individuals And it is individuals who will need to steer society and organizations toward a more just and equitable world The book takes a holistic approach to sustainable development The authors argue that this approach starts and ends with the human being They believe that the personal dimension of sustainable development has been neglected and that it is clear that sustainable societies cannot be achieved without committed individuals who are convinced of the need to be part of the sustainability project The authors frame their ideas around the Three Levels of Sustainability TLS framework which they argue addresses at least some of the weaknesses inherent in a fragmented approach to sustainability Their approach encompasses societal organizational and individual levels and by looking through the lens of how sustainability has evolved provides a roadmap for producing the kind of leaders necessary for sustainable development in all of its dimensions people planet and profit The focus on how the individual can contribute to these three dimensions is unique To arrive at this multi level and multi dimensional framework the book introduces and analyzes theories from sustainable development corporate social responsibility and personal leadership and systemically looks for linkages between them that are useful for sustainability This framework is placed firmly in its historical context The authors are highly literate about the development and interpretations of sustainability and bring us to their current position via informed discussions on the history of economics business and environment social development the corporation and the profit principle CSR and measurement and reporting The book has been designed as both a text for students as well as those already in management and leadership positions in the private public or non profit sectors and will also prove invaluable to those wishing to familiarize themselves with sustainability
