Spiritual Situation In Our Technological Society:

Theologies of Failure Robert Sirvent,Duncan B. Reyburn,2020-01-01 What does failure mean for theology In the Bible we find some unsettling answers to this question We find lastness usurping firstness and foolishness undoing wisdom We discover too a weakness more potent than strength and a loss of life that is essential to finding life Jesus himself offers an array of paradoxes and puzzles through his life and teachings He even submits himself to humiliation and death to show the cosmos the true meaning of victory As David Bentley Hart observes most of us would find Christians truly cast in the New Testament mold fairly obnoxious civically reprobate ideologically unsound economically destructive politically irresponsible socially discreditable and really just a bit indecent By incorporating the work of scholars working with a range of frameworks within the Christian tradition Theologies of Failure aims to offer a unique and important contribution on understanding and embracing failure as a pivotal theological category As the various contributors highlight it is a category with a powerful capacity for illuminating our theological concerns and perspectives It is a category that frees us to see old ideas in a brand new light and helps to foster an awareness of ideas that certain modes of analysis may have obscured from our vision In short this book invites readers to consider how both theology and failure can help us ask new questions discover new possibilities and refuse the ways of the world **Human Technological Enhancement and Theological Anthropology** Victoria Lorrimar,2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension mind uploading mood enhancement and moral enhancement This work draws on metaphor studies cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity *Jacques Ellul and the Technological Society in the 21st Century* Helena M. Jerónimo,José Luís Garcia,Carl Mitcham,2013-07-08 This volume rethinks the work of Jacques Ellul 1912 1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul s insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul s diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed

knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul s work as a whole but above all it opens up a space for examining religious life in the technological society   <u>Religious Internationalism</u> Matthew Lon Weaver,2010 Religious Internationalism assembles and assesses for the first time the ethics of war and peace in the writings of Paul Tillich It sketches the evolution of Tillich s thought from the period of his service in the German Imperial Army through the time of the Cold War The work begins by analyzing Tillich s theological roots and his World War I chaplaincy sermons as the starting point for his thoughts on power and nationalism Then Religious Internationalism looks to his postwar turn to socialist thought and his participation in religious socialism fueling his cultural analyses and culminating in his forced emigration under Hitler Next it probes the American interwar period giving special attention to Tillich s self described boundary perspective as well as the one treatise he wrote on religion and international affairs The book also examines his Voice of America speeches written and broadcast into his former homeland during World War II Weaver next considers Tillich s message to his English speaking audience of that period emphasizing social and world reconstruction The discussion continues by examining his vision of a path toward personhood in a bipolar world Finally the book constructs Tillich s ethics of war and peace as an ethic of religious internationalism suggesting adjustments intended to give it more universal significance The study concludes that Tillich s thought has provocative contributions to make to debates regarding civilizational conflict economics and international justice trade and globalization the defense of unprotected minorities and immigration policy Book jacket   <u>Gilkey on Tillich</u> Langdon Gilkey,2000-01-13   **Animals in Tillich's Philosophical Theology** Abbey-Anne Smith,2017-10-02 This book explores how Paul Tillich s systematic theology focusing on the concepts of being and reason can benefit nonhuman animals while also analysing how taking proper account of nonhuman animals can prove immensely beneficial The author first explains the body of Tillich s system examining reason and revelation life and the spirit and history and the kingdom of God The second section undertakes a critical analysis of Tillichian concepts and their adequacy in relation to nonhuman animals addressing topics such as Tillich s concept of technical reason and the multidimensional unity of life The author concludes by discussing the positive concepts in Tillich s systematic theology with respect to nonhuman animals and creation including the concept of universal salvation and Tillich s interpretation of nonhuman animals and the Fall in Genesis   <u>Modernity and the Problem of Cultural Identity</u> A.P. Dubey,2008 The question of modernity and the problem of cultural Identity have been intensively debate from various points views Three concepts of identity have been appreciated and emerged from lively deliberations during this discourse First concept being essentialist concept of identity has been defined to be one which is generated throgh self experience as self evident The second being post modern concept referred to as one which is independent of socio influences and likewise the theird concept as realized in recent times is one that is based on realist view of identity According to this view identity is fundamental element of social liberation and oppression The book presents these three views of identity and their possible role in obviating and addressing

the problems with possible alternatives If so implemented how they could bring the social individual and eventual leads in the society this book will certainly present a number of new solutions tjo the existing current problems **Beauty in Science and Spirit** Paul H. Carr,2007-10 *Trajectory of the 21st Century* Lawrence J. Terlizzese,2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book s theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a postrationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentatlity New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century *Theology, Ethics, and Technology in the Work of Jacques Ellul and Paul Virilio* Michael Morelli,2021-06-17 Theology Ethics and Technology in the Work of Jacques Ellul and Paul Virilio examines biographical and textual connections between sociologist theologian Jacques Ellul and philosopher phenomenologist Paul Virilio Through an examination of their embeddedness in the socio historical context of postwar France Michael Morelli identifies a relationship between these critics of technology that bears the marks of a nascent theological tradition He shows from various vantage points how Ellul and Virilio s nascent tradition exposes technology as modernity s primary idol and how these thinkers use multiple disciplines including history sociology philosophy phenomenology theology and ethics to resist the perilous consequences of the modern world s worship of power and the kinds of technologies this misdirected worship produces Jacques Ellul s death in 1994 and Paul Virilio s death in 2018 may have prevented the maturation of this nascent theological tradition but this book will aid in this tradition s ripening through the presentation of an illuminating way to read these two unique prophetic intellectuals **Thinking about God in an Age of Technology** George Pattison,2005-09-22 Technology shapes every aspect of contemporary life but George Pattison argues that thinking about God offers a creative counter movement to the dominant technological culture His argument is applied to questions of ethics university study the arts and urban living The End of Ethics in a Technological Society Lawrence E. Schmidt,Scott Marratto,2008-02-06 Lawrence Schmidt and Scott Marratto challenge modern liberal ethics arguing that there

is no consistent ethical framework to deal with the long range negative consequences of certain technological developments They examine established ethical approaches to such urgent contemporary concerns as environmental degradation nuclear energy high tech militarism and fetal genetic testing showing that the prevailing viewpoint valorizes autonomy above all other goods and considers technological advances as mere extensions of the range of human freedoms Modern ethics thus fails to take into account the moral intuition that some possibilities in the realm of techno science simply ought not to be pursued A comprehensive assessment of modern western society s commitment to technological progress The End of Ethics in a Technological Society presents a convincing argument in favour of a post liberal approach one that rejects the ideology of progress supports caution and accepts limitation **Longing for More** Blake S. Hart,2025-06-25 Why do people long for more Why in an age of progress and endless possibilities do so many feel restless fragmented and unfulfilled Longing for More Man s Quest for Meaning and the Hope of Christ explores humanity s enduring search for purpose in a world increasingly marked by disillusionment Blake S Hart masterfully weaves intellectual history philosophy and theology to trace the unraveling of meaning in modernity from the optimism of scientific progress to the existential despair of postmodernism and New Atheism Through the insights of profound thinkers like Dostoevsky Eliot and Frankl readers will grapple with life s deepest questions Voices of restoration such as Chesterton Lewis and Tolkien illuminate the way forward revealing how beauty imagination and faith rekindle meaning in an age of doubt This book is a call to reclaim purpose through faith community and the Christian narrative With practical wisdom and inspiring clarity Longing for More invites readers to rediscover the joy and hope found in Christ equipping them to live as restorers in a world longing for meaning It is an invitation to the greatest journey of all *Key Thinkers for the Information Society* Christopher May,2003-08-29 Key Thinkers for the Information Society provides an introduction to some important social theorists whose work has considerable relevance to today s brave new world of information and communication technologies With the aim of widening current perspectives on the information society each contributor introduces a particular theorist and discusses the way in which their insights can be reintroduced into debates regarding the social political and cultural impact of ICTs Theorists presented in Volume 1 include some well known and some less well known figures Walter Benjamin Murray Edeleman Jacques Ellul Harold Innes Lewis Mumford Karl Polanyi Eric Elmer Scattachneider and Raymond Williams Each has something fresh and pertinent to say and taken as a whole this volume provides an exciting new resource for contemporary studies *Faith, Hope, and Love in the Technological Society* Franz A. Foltz,Frederick A. Foltz,2018-07-31 Franz and Frederick Foltz examine how modern technology creates an environment that significantly affects Christianity by reducing the mysteries of faith to manageable techniques The body of their work analyzes the effects of technology on the theological virtues of faith hope and love the triad that believers have used for a common narrative to understand and express their thoughts and experiences They begin by looking at how recent developments have brought us into a post truth era by

removing words from their context in nature time place and community Popular theologies such as the power of positive thinking the laws of creation the plan for salvation and the prosperity gospel reflect this change by gearing all for efficiently getting what we want and ignoring tradition The authors then examine each of the virtues separately finding that faith has become a risk management tool that depends on confidence in systems rather than personal relationships hope is defined as the expectation that our present desires shall be granted rather than a vision of the future and love has become an intimacy that provides escape from the real world and community rather than a self denying care for them Finally the authors take a look at some appropriate responses **Theology and Technology, Volume 1** Carl Mitcham,Jim Grote,Levi Checketts,2022-07-21 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey s Philosophy and Technology the essays collected in the two volumes of Theology and Technology span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H Richard Niebuhr s five ideal types in Christ and Culture The second volume includes biblical historical and modern theological engagements with the place of technology in the Christian life This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul Taken together these essays some reproductions of earlier work and others original for this project provide any student of theology a fitting entr e into considering the place of technology in the realm of the sacred **Democracy in a Technological Society** L. Winner,2013-03-09 This ninth volume is one of the most arnbitious in the Philosophy and Technology series Edited by technopolitical philosopher Langdon Winner it assembles an impressive collection of philosophers and political theorists to discuss one of the most important topics of the end of the twentieth century the bearing of technology in all its rarnifica tions on the practice of democratic politics in the developed world When set beside the previous volume in the series Europe America and Teehnology the two together open a philosophical dialogue of great significance about the ways technology challenges democracy at its very roots Some philosophers think the attack is fatal Others are optimistic that democratic means can be discovered or invented for the control of technology Still others object to an optimism versus pes simism formulation of the issue But alI agree that the issue is highly significant one that demands serious philosophical inquiry The Society for Philosophy and Technology was fortunate in being able to draw this group of writers to Bordeaux France in 1989 along with a large number of others whose contributions to the debate could not be included here It is equally fortunate to have chosen Langdon Winner as president when the time carne to select the best of the papers to fashion this volume University of Delaware PAUL T Democratic Theory and Technological Society Richard B. Day,Ronald Beiner,Joseph Masciulli,2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology and how can democratic theory best respond to or at least reflect on those challenges Inhabiting the kind

of technologically advanced era in which we live what sources are available within political theory for theoretical insight concerning the problem of democratic engagement with technology The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions including Hegel and Marx Rousseau and John Dewey Heidegger and Simone Weil Habermas and Walter Benjamin Hannah Arendt and Hans Jonas Commentaries on all these important thinkers focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life yields rich and ambitious resources for theoretical reflection **Religion and Technology in the 21st Century: Faith in the E-World** George, Susan Ella,2006-05-31 This book examines the unique synergy between religion and technology and explores the many ways that technology is shaping religious expression as well as ways that religion is coming to influence technology Provided by publisher **Technology, Society and Sustainability** Lech W. Zacher,2017-03-02 This collection is a multidisciplinary and multicultural contribution to the current sustainability discourse It is focused on two main dimensions of our world complexity and diversity Desirable and urgent transition of socio technological systems toward a sustainability trajectory of development requires a better understanding of technological trends and social transformations General advancement of technology does not produce identical changes in various societies differentiated economically and culturally Moreover the abilities to approach sustainable development change over time and space As a result there is a constant need for continuing research analyses and discussions concerning changing contexts and adequacy of strategies and policies Authors from twelve countries and of different academic and cultural settings present their insights analyses and recommendations The collection is focused both on contexts and on activities leading to sustainable trajectories in various domains of economy and social life Continuing research and discussion is needed to better understand these challenges and to prepare the appropriate strategies and solutions Development of socio technological systems is nowadays very complex moreover the world we live in is extremely diverse Therefore sustainability discourse must be ongoing introducing new ideas concepts theories evidence and experience by various parties academics professionals and practitioners
