The Manipulator Inscribed:

The Manipulative Mode Ilja Leonard Pfeijffer, Karl A. E. Enenkel, 2017-07-31 This book deals with political propaganda in classical antiquity exploring the contexts strategies and parameters of a fascinating phenomenon that has often been approached with anachronistic models such as the centrally organized propaganda machines of the 20th century totalitarian regimes or completely ignored It offers case studies on the archaic period classical Athens the Hellenistic kingdoms the Augustan age and the late Roman empire and emphasizes concepts such as interaction integration and horizontal orientation

Inscribed Landscapes Bruno David, Meredith Wilson, 2002-01-01 Annotation Inscribed Landscapes explores the role of inscription in the social construction of place power and identity Bringing together twenty one scholars across a range of fields primarily archaeology anthropology and geography it examines how social codes and hegemonic practices have resulted in the production of particular senses of place exploring the physical and metaphysical marking of place as a means of accessing social history

Occupying Architecture Jonathan Hill, 2005-07-28 Occupying Architecture focuses on the importance of the user of architecture It emphasises the cross currents between design theory and use and the need for a wider cross cultural approach to architecture Beginning with the architect the book proceeds to explore models for architectural practice that actively engage the issue of use and concludes with examination of the user The authors draw on illustrations and examples from London Las Vegas Barcelona and Bruges to discuss how and why architecture ignores the user The apparant contradictions between the producer and the product of architecture are highlighted before the activities of the architect and the actions of the user are explored This book illustrates that architecture is not just a building it is the relation between an object and its occupant

The Ancient World Revisited:

Material Dimensions of Written Artefacts Marilina Betrò, Michael Friedrich, Cécile Michel, 2024-03-04 Written artefacts are traditionally studied because of their content Material aspects of these artefacts enrich the study of ancient history in many ways Eleven case studies in five sections on the ancient world including the Near East Egypt the Mediterranean China and India demonstrate the impact of a holistic approach that considers materiality and content alike Following an introductory sketch of relevant research the first section Methodological Considerations critically examines the limitations the evidence available imposes on our understanding Early Uses of Writing addresses material and spatial aspects of inscriptions and their communicative functions over the textual ones The third section Material Features deals with clay wooden and papyrus manuscripts and demonstrates the importance of an integrated approach The contributions to Co presence of Written Artefacts take into account that written artefacts come in clusters The final section Cultural Encounters presents studies on the interactions between social strata and ethnic groups challenging previous ideas The volume contributes to the comparative study of written artefacts in ancient history stimulating cross disciplinary and cultural

research Mechanism Design for Robotics Saïd Zeghloul, Med Amine Laribi, Marc Arsicault, 2021-05-08 This book presents the proceedings of the 5th IFToMM Symposium on Mechanism Design for Robotics MEDER 2021 held in Poitiers France 23-25 June 2021. It gathers contributions by researchers from several countries on all major areas of robotic research: development and innovation as well as new applications and current trends. The topics covered include theoretical and computational kinematics, mechanism design, experimental mechanics, mechanics of robots, control issues of mechanical systems, machine intelligence, innovative mechanisms and applications, linkages and manipulators, micro mechanisms, dynamics of machinery and multi-body systems. Given its scope, the book offers a source of information and inspiration for researchers seeking to improve their work and gather new ideas for future developments. New Trends in Mechanism and Machine Science Philippe Wenger, Paulo Flores, 2016-09-03 This book collects the most recent advances in mechanism science and machine theory with application to engineering. It contains selected peer-reviewed papers of the sixth International Conference on Mechanism Science held in Nantes France 20-23 September 2016, covering topics on mechanism design and synthesis, mechanics of robots, mechanism analysis, parallel manipulators, tensegrity mechanisms, cable mechanisms, control issues in mechanical systems, history of mechanisms, mechanisms for biomechanics and surgery, and industrial and nonindustrial applications. **The Rhetoric of Manipulation** Robert Harvey, 2025-03-20 A provocative and timely look at how language is used to manipulate the truth, how our gullibility leaves us susceptible to manipulation, and what we can do to reverse these trends. *The Rhetoric of Manipulation* looks behind the curtain of political and social communications in the age of fake news and the post-truth to show how the perversely engineered semantics at work today shape culture and undermine reality. While language has always been manipulated to direct or anesthetize thought, today's semantic perversions orient opinion and subdue political action to an alarming degree. Under such conditions, we are particularly susceptible to demagoguery. Arguing that too many of us have let our critical faculties wither, Robert Harvey opens our ears and eyes to an insidious impediment to free thinking by unflinchingly examining five realms of semantic perversion: the contemporary vocabulary of war, the recently evolved language tool known as scare quotes, the terms used to peddle white supremacy, the phenomenon of so-called cancel culture, and the jargon deployed in the corporatization of higher education. The wager of *The Rhetoric of Manipulation* is that a frank exposé of bad faith discursive practices and our accompanying gullibility can contribute to reversing the trend, remedying the current situation in view of a far more ethical immediate future and remediating some of the damage already done. *Reading East Asian Writing* Michel Hockx, Ivo Smits, 2014-02-05 This book presents contributions by thirteen scholars of Chinese and Japanese literature whose work is characterised by a strong interest in literary theory. They focus in particular on the various new theories that have emerged during the past two decades: uprooting traditional forms of understanding literary texts, their function, their readership, and their interpretation. Often confined to discussion of a specific country or area, these theories have been criticised for their

Western bias This collection breaks through these barriers providing an opportunity for scholars of two closely related yet often independently studied cultures to present and compare their views on specific theories of literature to discuss the advantages and shortcomings of those theories and to consider specific difficulties related to the East West dimension

The Mark of Theory Andrea Bachner, 2017-11-28 What imaginaries tropes and media have shaped how we theorize The Mark of Theory argues that inscription constitutes one of the master metaphors of contemporary theory As a trope that draws on a wide array of practices of marking from tattooing to circumcision from photographic imprints and phonographic grooves to marks on a page inscription provides an imaginary that orients and irritates theoretical thought Tracing inscriptive imaginaries from the late nineteenth century to today The Mark of Theory offers a wide ranging conceptual genealogy of contemporary thought Navigating poststructuralism's attention to figurative language as well as media theory's attention to objects phenomena and practices of mediation the book works through core questions for how we theorize Across a range of disciplines and scholarly conversations from literature and media to anthropology race and gender art psychoanalysis sound and ultimately ethics sites of inscription come to constitute the past legacy of a thought to come a prehistory of our current moment In focusing on materiality and mediation The Mark of Theory shows how inscriptive practices shape conceptual thought as well as political and ethical choices By contextualizing the fraught relationship between materiality and signification The Mark of Theory lays the ground for a politics of theory that begins there where theory and politics are no longer conflated
